Education An Introduction:

An Introduction to Education Hasan Arslan, 2018-07-26 This volume offers a set of strategies and materials in education developed to assist teachers in guiding their classroom and students in understanding fundamental subjects of teaching. It serves to ensure the highest levels of academic achievement for all students and will help students develop a positive self concept by providing knowledge about the various dimensions of teaching. Including contributions from academics and researchers the book encompasses eight chapters: Fundamental Concepts of Education, Teachers and Teaching, Social Foundation of Education, Philosophy and Educational Philosophy, Psychology and Educational Psychology, Foundation of Educational Politics, Comparative Educational Systems, and Sociocultural Perspectives. This volume will appeal to a wide range of readers including educators, researchers, students, teacher trainers, and teachers of all subjects and of all levels who wish to develop both personally and professionally. *The Philosophy of Education: An Introduction* Richard Bailey, 2014-10-28 The Philosophy of Education An Introduction encourages the reader to actively engage with the philosophy of education and the carefully selected contributors bring the philosophy of education to life for the reader. Each chapter focuses on a particular area of debate and explains the main concepts, includes extracts from philosophical writing followed by questions that guide the reader to critically and actively engage with the text, guides the reader towards further reading and suggests next steps and more challenging sources or counter pointed arguments. The Philosophy of Education An Introduction is essential reading for education students and for trainee teachers on undergraduate and postgraduate programmes. It will also appeal to practicing teachers and educationalists who wish to engage with philosophical approaches to contemporary educational issues. **An Introduction to the Foundations of Education** Allan C. Ornstein, Daniel U. Levine, 1985 **Exploring Education** Alan R. Sadovnik, Peter Cookson, Jr., Susan Semel, Ryan Coughlan, 2017-10-10 This much anticipated fifth edition of Exploring Education offers an alternative to traditional foundations texts by combining a point of view analysis with primary source readings. Pre and in service teachers will find a solid introduction to the foundations disciplines: history, philosophy, politics, and sociology of education and their application to educational issues including school organization and teaching curriculum and pedagogic practices, education and inequality, and school reform and improvement. This edition features substantive updates including additions to the discussion of neo liberal educational policy, recent debates about teacher diversity, updated data and research, and new selections of historical and contemporary readings. At a time when foundations of education are marginalized in many teacher education programs and teacher education reform pushes scripted approaches to curriculum and instruction, Exploring Education helps teachers to think critically about the what and why behind the most pressing issues in contemporary education. *Democracy and Education* John Dewey, 1916 The following pages embody an endeavor to detect and state the ideas implied in a democratic society and to apply these ideas to the problems of the enterprise of education. The discussion includes an indication of the constructive

aims and methods of public education as seen from this point of view and a critical estimate of the theories of knowing and moral development which were formulated in earlier social conditions but which still operate in societies nominally democratic to hamper the adequate realization of the democratic ideal As will appear from the book itself the philosophy stated in this book connects the growth of democracy with the development of the experimental method in the sciences evolutionary ideas in the biological sciences and the industrial reorganization and is concerned to point out the changes in subject matter and method of education indicated by these developments
