Emotional Adjustments to Illness Noonan,1975-03 *Understanding Socioemotional And Academic Adjustment During Childhood And Adolescence, Volume I* José Manuel García-Fernández, Carolina Gonzálvez, Ricardo Sanmartín, Maria Vicent, Nelly Lagos San Martín, 2022-02-25 *Understanding Psychosocial Adjustment to Chronic Illness and Disability* Fong Chan, Elizabeth Da Silva Cardoso, Julie Chronister, Julie A. Chronister, 2009-06-16

Rehabilitation practitioners face the difficult task of helping clients adjust to chronic illness or disability. This can be a long and trying process for both practitioner and client. With this handbook however practitioners and students can gain a wealth of insight into the critical issues clients face daily. This book presents the dominant theories, models, and evidence-based techniques necessary to help the psychosocial adjustment of chronically ill or disabled persons. Each chapter is written from an evidence-based practice (EBP) perspective and explores how important issues, i.e., social stigma, social support, sexuality, family, depression, and substance abuse, affect persons adjusting to chronic illness and disability. Key features include:

- A review of psychopharmacological treatment options for depression, anxiety, and other disorders coinciding with rehabilitation.
- The effect of rehabilitation on the family, including key family intervention strategies.
- Strategies for using positive psychology and motivational interviewing in rehabilitation.
- Multiculturalism and the effect of culture on the adjustment process.

Ancillary materials including an instructor's manual with a syllabus, examination items, PowerPoint presentation, and answers to class exercises. By incorporating research-based knowledge into clinical rehabilitation practice, health care professionals can ensure that people with chronic illness and disability receive only the best treatment.
