## **Employing Qualitative Methods In The Private Sector:**

**Employing Qualitative Methods in the Private Sector** Marilyn L. Mitchell, 1998-07-10 Each year academic institutions produce thousands of social science graduates skilled in applied social research many more than can be absorbed in the teaching profession In one of the latest volumes in the Qualitative Research Methods series author Marilyn Mitchell provides information often left out of the social science curriculum how and where can social scientists put their skills to use in the private sector *Employing Qualitative Methods in the Private Sector* outlines some of the basic private sector research settings and provides clear and sensible advice on how one can rename one's skills and market oneself most effectively to the business community Mitchell herself employed in the private sector also examines project and business management Straightforward and pragmatic *Employing Qualitative Methods in the Private Sector* is an essential tool for the researcher looking for new avenues in which to apply their research

**Teaching Qualitative Research** Rosalind E. Hurworth, 2008-01-01 Over the past two decades there has been a plethora of book for students about how to tackle Qualitative Research QR but absolutely nothing on how to teach it This book attempts to redress the imbalance by presenting a history of what is known about QR teaching as well as to bring alive current QR teaching and learning through a set of Australian and British case studies Courses visited were located within a variety of disciplines including Education Sociology Anthropology Nursing Psychology Communications and Evaluation were taught by both experienced and inexperienced lecturers were either presented alone or in pairs took place in a range of institutions lasted from seven weeks to a year and involved from 15 to over 100 students It emerged however that no matter what the context several common issues were raised such as Should you teach theory practice or both How do you determine a curriculum for a QR course What is the best way to manage student projects How should students of QR be assessed In what ways can the constraints of University structures be confronted and How can lecturer deficiencies in training and experience be overcome To answer such questions Professor Hurworth draws deftly from personal observations and rich conversations with both lecturers and students from all the courses described As a result many practical ideas for moving the teaching and learning of QR forward are suggested

**Writing Up Qualitative Research** Harry F. Wolcott, 1990-08 Written in an accessible style this volume tackles the topics of beginning to write continuing to write editing and getting published It is indispensable not only to qualitative researchers but to anyone engaged in social research for whom the link between conducting research and writing it up seems more like an obstacle than an opportunity

**Reliability and Validity in Qualitative Research** Jerome Kirk, Marc L. Miller, 1986 Qualitative research is a sociological and anthropological tradition of inquiry Most critically qualitative research involves sustained interaction with the people being studied in their own language and on their own turf To see qualitative research as strictly disengaged from any form of counting is to miss the point that its basic strategy depends on the reconciliation of diverse research tactics It is our view that qualitative research can be performed as social science

Understanding the workings of a scientific endeavor whether it is of the natural or social variety entails an appreciation of its objectivity By this convention the objectivity of a piece of qualitative research is evaluated in terms of the reliability and validity of its observations the two concepts to which this monograph is devoted *Focus Groups as Qualitative Research* David L. Morgan,1996-10-23 The extensively revised edition of the best selling Focus Groups as Qualitative Research continues to provide an excellent guide for researchers across the disciplines Reflecting the many changes that have occurred in the study of focus groups in recent years the book begins with an updated introduction offering a discussion of current social science approaches to focus groups Expanded coverage on the comparison of focus groups to individual interviews follows and there is more material on the strengths and weaknesses of focus groups The section on self contained focus groups has also been expanded Subsequent chapters have been revised to include examples from social scientists who have established their own practices and methodological research on focus groups In conclusion the author offers future directions and references that take into account the explosive growth of focus groups as a research tool for all social scientists A Narrative Approach to Organization Studies Barbara Czarniawska-Joerges,1998 From setting up the fieldwork to writing up the research this volume takes readers through the narrative approach to qualitative research with a focus on organization studies Inspired by the work of Bakhtin Eco Rorty and Silverman the author demonstrates that narratives are still the main carriers of knowledge in all societies **Research Methods for Educational Leadership and Management** Musundire, Austin,2025-05-13 Various research methods including action case study and experimental research can be tailored for educational leadership and management Different research designs data collection techniques and data analysis methods have differing strengths weaknesses and challenges As a result it is crucial to develop the skills and confidence needed to conduct high quality research Developing a deeper understanding of how to conduct rigorous research may consequently foster more effective and innovative research leading to improved educational policies practices and outcomes Research Methods for Educational Leadership and Management illustrates how these methods can be effectively applied to address issues in educational leadership and management It promotes best practices in educational research by highlighting ethical considerations addressing common challenges and providing strategies for overcoming these obstacles Covering topics such as equity employment practices high performance culture and professional competencies this book is an excellent resource for educational leaders school managers school administrators policymakers researchers professionals scholars academicians and more **Research Methods in Public Administration and Nonprofit Management** David E. McNabb, Never HIGHLIGHT a Book Again Includes all testable terms concepts persons places and events Cram101 Just the FACTS101 studyguides gives all of the outlines highlights and quizzes for your textbook with optional online comprehensive practice tests Only Cram101 is Textbook Specific Accompanies 9780765628794 This item is printed on demand The Ethnographer's Method Alex Stewart,1998-06-17 In this volume Alex Stewart shows novice and

experienced ethnographers how to explain and present the methods they use in terms understood by those not in the field

**The Business of Ethnography** Brian Moeran, 2021-01-07 Can an anthropologist help us understand the world of business Armed with this question veteran anthropologist Brian Moeran embarks on an in depth study of cultural production and creative industries in Japan At once the blundering ethnographer and shrewd observer Moeran is able to shed light not only on social behavior and human relations in general but more specifically on the importance of strategic exchange to all business practices Moeran s fieldwork rooted in participant observation of business life in communities and corporations leads him to an original theory of how business operates Culture is not all powerful Moeran shows Instead social structures strongly influence behavior At the heart of Moeran s analysis is a firm belief in fieldwork and ethnography terms much bandied about in business management and cultural studies but rarely undertaken in depth The Business of Ethnography not only provides a useful methodology for people studying or wishing to understand business but also acts as a clarion call for anthropologists to rethink their discipline beyond traditional fieldwork sites
