Employment, Economics, and Technology C. M. Cooper, Charles Cooper, John Clark, 1982 Monograph examining the impact of technological change on the labour market in developed countries using mathematical models discusses the effects on private investment consumer demand capital formation employment creation etc and considers macroeconomic policies to deal with structural unemployment and likely constraints Graphs and references

Technology and Employment Richard Michael Cyert, David C. Mowery, Committee on Science, Engineering, and Public Policy (U.S.). Panel on Technology and Employment, 1987 This report addresses a number of issues that have surfaced in the debates over the impact of technological change on employment These issues include the effects of technological change on levels of employment and unemployment within the economy on the displacement of workers in specific industries or sectors of the economy on skill requirements on the welfare of women minorities and labor force entrants in a technologically transformed economy and on the organization of the firm and the workplace It concludes that technological change will contribute significantly to growth in employment opportunities and wages although workers in specific occupations and industries may have to move among jobs and careers Recommends initiatives and options to assist workers in making such transitions ISBN 0 309 03744 1 pbk

Technological Change and Labor Markets Reyna Elizabeth Rodríguez Pérez, Liliana Meza González, 2024-10-28 In developed countries like the US Germany and the UK it has been observed that workers who perform non routine activities either cognitive or manual have benefited in terms of employment and income while those performing routinary tasks have seen their job prospects and wages decline This has led to a polarization of the labor markets and to a decrease in certain measures of inequality This phenomenon has been attributed to task biased technological change TBTC which differs from the skilled biased technological change in the fact that not only highly skilled workers have benefited from technology advancement This book presents evidence of how digitalization and task biased technological change are affecting the labor markets of different regions of the world and examines the factors that cause this inequality among nations It examines recent issues around the effect of task biased technological change on labor markets and the economy in general with a comparison of different countries in Central and Eastern Europe North America and Latin America as well as in other regions of the world The incorporation of the abovementioned regions presents relevant particularities for the subject matter addressed in the book The book also considers questions such as how labor market effects differ by gender and what the impact of digital skills on employment inequalities and public policies might be In so doing it identifies the advances opportunities and changes that have taken place while also making public policy proposals The main market for the book is the global community of graduate students and researchers in the field of economics and specifically in the study of labor markets

The Social and Economic Impact of New Technology 1978-84: A Select Bibliography Leslie Grayson, 2012-12-06 Silicon chip technology microprocessor technology information technology or quite simply new technology These are some of the names representing the microelectronics revolution depending upon the audience being addressed by speaker or writer No previous new industrial development has caused such widespread publicity and discussion amongst users and researchers as the new technology Concern is being expressed about the effects of new technology on employment job satisfaction social life leisure activities and the economics of commerce and industry The late 70s saw many doom laden predictions of those effects but by 1983 both management and trade unions were taking a more objective view of the social and economic impacts and many correspondents now see the new technology as a means of opening up new industries and overcoming the effects of world recessions The chip has involved the factory floor the office the supermarket and the home Electronic funds transfer electronic shopping microelectronic domestic appliances word processors and microprocessor controlled machinery mean that the new technology has pervaded all aspects of social and economic life and the developed countries are now coming to accept it as part of society as a whole Inevitably the flood of literature on the social and economic impacts of new technology has been overwhelming Unfortunately the quality of information and arguments propagated at conferences in journal papers and research reports has indicated that there has been little quantifiable evidence available on the effects of these impacts

Economics of the Labour Market P. N. (Raja) Junankar, 2016-01-12 The global crisis has led to dramatic increases in unemployment rates over most of the countries of the OECD This book provides alternative explanations of this phenomenon Junankar begins with surveys of the labour market labour demand labour supply and labour force participation He argues that the growth of unemployment and long term unemployment is mainly due to a lack of aggregated demand and not due to high unemployment benefits *Economics of the Labour Market* shows that unemployment and long term unemployment impose serious and significant costs on individuals families and society in general Raja Junankar focuses on vital social issues arising from the malfunctioning of economies and this collection of essays tackles the real cost of unemployment

Economics of Structural and Technological Change Cristiano Antonelli, Nicola De Liso, 2002-09-11 Technology has long been seen as a path to economic growth However there is considerable debate about the exact nature of this relationship *Economics of Structural and Technological Change* employs a wide range of theoretical and applied approaches to explore the concept of technological change The book begins with a series of in depth discussions of the economic analysis of technological change The second section contains a discussion of theoretical models of technological change focusing on issues such as time and innovation The third section brings together a number of applied analyses of technological change and examines the effect of factors such as human resource constraints patenting and science and technology indicators
