Employment Regimes and the Quality of Work Duncan Gallie,2009 The book makes a major new contribution to the sociology of employment by comparing the quality of working life in European societies with very different institutional systems France Germany Great Britain Spain and Sweden It focuses in particular on skills and skill development opportunities for training the scope for initiative in work the difficulty of combining work and family life and the security of employment Drawing on a range of nationally representative surveys it reveals striking differences in the quality of work in different European countries It also provides for the first time rigorous comparative evidence on the experiences of different types of employee and an assessment of whether there has been a trend over time to greater polarization between a core workforce of relatively privileged employees and a peripheral workforce suffering from cumulative disadvantage It explores the relevance of three influential theoretical perspectives focussing respectively on the common dynamics of capitalist societies differences in production regimes between capitalist societies and differences in the institutional systems of employment regulation It argues that it is the third of these an employment regime perspective that provides the most convincing account of the factors that affect the quality of work in capitalist societies The findings underline the importance of differences in national policies for people s experiences of work and point to the need for a renewal at European level of initiatives for improving the quality of work      **At Home and Abroad** Francine D. Blau, Lawrence M. Kahn,2002-04-11

Throughout the latter part of the 20th century the U S labor market performed differently than the labor markets of the world s other advanced industrialized societies In the early 1970s the United States had higher unemployment rates than its Western European counterparts But after two oil crises rapid technological change and globalization rocked the world s economies unemployment fell in the United States while increasing dramatically in other nations At the same time wage inequality widened more in the United States than in Europe In *At Home and Abroad* Cornell University economists Francine D Blau and Lawrence M Kahn examine the reasons for these striking dissimilarities between the United States and its economic allies Comparing countries the authors find that governments and unions play a far greater role in the labor market in Europe than they do in the United States It is much more difficult to lay off workers in Europe than in the United States unemployment insurance is more generous in Europe and many fewer Americans than Europeans are covered by collective bargaining agreements Interventionist labor market institutions in Europe compress wages thus contributing to the lower levels of wage inequality in the European Union than in the United States Using a unique blend of microeconomic and microeconomic analyses the authors assess how these differences affect wage and unemployment levels In a lucid narrative

they present ample evidence that as upheavals shook the global economy the flexible U S market let wages adjust so that jobs could be maintained while more rigid European economies maintained wages at the cost of losing jobs By helping readers understand the relationship between different economic responses and outcomes At Home and Abroad makes an invaluable contribution to the continuing debate about the role institutions can and should play in creating jobs and maintaining living standards

**Work and Idleness** Jane Wheelock,John Vail,2012-12-06 Work and Idleness develops the view that redistributing employment is a feasible capitalist solution not just to the unemployment which particular groups suffer but also to the work that others have to contend with including many women Putting the redistribution of employment on the policy agenda opens up debate on how to ensure a more equitable and fulfilling relationship between the ways we gain our livelihoods and the lives we lead Growing insecurity in labour markets and changing patterns in the commodification of labour have led to a redistribution of paid and unpaid labour time as the structure of power relations the gender order discrimination and state regulation have been modified The first main trend affecting insecurity is mass unemployment and the growth of workless households A second notable trend is a gender based redistribution of hours worked The third major trend is a shift from full time waged work to full time self employment Part I of this book presents the main economic theories driving the continuing divide between the intensification of work and the extension of idleness Part II documents the ways in which the shift to mass idleness in advanced industrial countries has hit some groups particularly hard the youngest

and oldest age groups and other groups including disabled workers have traditionally been subject to discrimination in the labor markets Part III provides a set of policy prescriptions

**Globalisation and its Discontents** John Wiseman, 2000-06-13 Most analyses of globalization convey the message that it is an unstoppable force sweeping away national sovereignty and inevitably creating a brave new world of borderless and boundless consumerism In such a context politics and democracy become irrelevant This collection of essays develops a more critical and grounded analysis of the nature and implications of globalization Many of the contributions to this book conclude that there are real political choices to be made Even though the economic context has changed politics still matters

*Whose Millennium?* Daniel Singer, 1999-03. Magisterial in its historical sweep, fiercely democratic in its vision, *Whose Millennium?* is the thinking person's bridge to the 21st century. There is an alternative to rampant inequality and the corruptions of power and ever so modestly and persuasively Daniel Singer points the way. Barbara Ehrenreich. This visionary book challenges the chorus of resignation, the notion that there is no alternative, that profit is the best relationship between people and that the market guarantees democracy. Daniel Singer insists that a more free and egalitarian society can be won and he predicts that the new millennium will be an age of confrontation, not consensus, with Western Europe as a probable first battlefield. In social criticism of rare scope and insight, Singer probes the outcome of the Russian Revolution and Russia's post 1989 turmoil, the transformation of the Polish trade union movement Solidarity into a reactionary and clerical force, the failure of social democracy in Western Europe, the emergence of an unbalanced world after the collapse of one superpower and the massive 1995 strikes and demonstrations in France which Singer argues were the first revolt against the prevailing idea that there is no alternative to market stringency. As an alternative, Singer calls for realistic utopia, a politics engaged with present day possibilities but daring to pursue a world beyond capitalism, one that would put into consistent practice the ideals of democracy and equality.
