Empowering Leadership Michael Fletcher, 2018-01-23 A major problem in the local church today is lack of leadership Simply put we have more needs than we have leaders to meet those needs So how do we train better leaders faster The truth is very few churches really have a well thought out leadership development plan Growth requires continually adding healthy new leaders who carry the church culture forward and embody its core values Everyone knows it but how do we achieve it In *Empowering Leadership* author and leadership consultant Michael Fletcher says leaders like this can't simply be bought nor can they be hired from someone else's leadership assembly line Developing leaders at every level to create an environment that attracts potential leaders and to build better leaders faster an organization needs more than a pipeline It needs a culture that develops leaders organically Finding the right kind of leaders to guide your church on a path of continual growth comes out of keeping the right focus and that focus is not just on the leaders In fact as Fletcher says It isn't about the leader It never was about the leader It will never be about the leader It will always and only be about Jesus and his people It's about the people True leadership development includes the often messy but necessary interaction of life upon life So hiring pastors and key staff roles from within the church is the very best policy people who breathe the culture of the church and who have helped create the culture you want to maintain If your church or organization needs a good leadership development structure then you're holding the right book *Empowering Leadership* details Michael's greatest insights on how to build better leaders faster by creating a leadership development culture in your church or organization naturally organically continually Empower your church or organization through great leadership This book will show you how

Project Managers' Leadership Styles in Information Technology Sector of Pakistan Muhammad Khalique Ahmad, Abu Bakar Abdul Hamid, Sazali ABD Wahab, 2021-10-26

In these competitive and turbulent times project organisations face severe challenges Despite the advancement of project management tools and techniques the rate of project failure exceeds that of success Regardless of calls for further empirical studies on the role of project leadership researchers struggle to find the best leadership styles for project success New digital transformation phenomena have forced organisations to offer more autonomy and decision making authority to those at lower hierarchical levels In this scenario top management support plays a facilitator role To the best of the researcher s knowledge no past studies have examined these critical project success factors simultaneously in a project environment Embedded in the theories of contingency goal setting and social cognition this study raised the hypothesis that project managers leadership styles impact project success via the mediation of goal clarity empowerment and self leadership as well as the moderation of top management support Data was collected by administering a cross sectional survey to 289 project organisations in the IT sector The results demonstrated that project managers transactional leadership style does not impact project success because goal clarity has an insignificant association with project success However the transformational leadership style showed a positive impact on project success because empowerment significantly and positively relates to project success The project manager s empowering leadership style was also found to positively influence project success through followers self leadership Additionally top management support revealed a significant moderating role by strengthening the relationship between empowerment and project success This study successfully fills theoretical gaps by introducing a novel moderated mediation model The findings also offer useful insights to practitioners by revealing that project managers transformational leadership and empowering leadership are needed to enhance and encourage employee empowerment and self leadership and ultimately secure project success
