Emergency Response to Terrorism Sondra Stein, United States Government Printing Office, 2000-11 **Science and Technology of Terrorism and Counterterrorism, Second Edition** Mark A. Prelas, Dabir S. Viswanath, Sudarshan K. Loyalka, 2010-08-10 Traditionally resources on terrorism and counterterrorism tend to focus on the social behavioral and legal aspects of the subject with minimal emphasis on the scientific and technological aspects Taking into account these practical considerations the second edition of Science and Technology of Terrorism and Counterterrorism discusses the nature of terrorism and the materials used by terrorists It describes how intelligence professionals and law enforcement personnel can detect and destroy these materials and how they can deal with terrorist groups This volume begins by

introducing the shift in analysis of terrorist attacks after September 11 2001 and summarizes selected case studies It discusses the origin and nature of terrorism and the factors involved in diplomacy Covering a broad range of topics the book examines Aerosol dispersion of toxic materials Bioterrorism and the manufacture detection and delivery of biological agents Agricultural terrorism Nuclear terrorism and nuclear weapons systems threats and safeguards Chemical terrorism including manufacture detection delivery and decontamination Cyber terrorism Personal protective equipment The role of government at federal state and local levels The role of international agencies and their resources capabilities and responsibilities The National Infrastructure Protection Plan As terrorist activities increase globally it is critical that those charged with protecting the public understand the myriad of ways in which terrorists operate While we cannot predict where when and how terrorists will strike our vigilance in staying abreast of the terrorist threat is the only way to have a fighting chance against those who seek to destroy our world *Combating Terrorism* United States. General Accounting Office,2001 *Emergency Response Handbook for Chemical and Biological Agents and Weapons* John R. Cashman,2008-03-31 Updated to reflect the numerous advances that have evolved since the September 11 terrorist attacks *Emergency Response Handbook for Chemical and Biological Agents and Weapons* Second Edition maintains its reputation as a comprehensive training manual for emergency responders to incidents involving nuclear biological and chemical materials **Combating terrorism FEMA continues to make progress in coordinating preparedness and response.** ,2001 In policy and practice FEMA has generally addressed the key lessons learned from its experience in coordinating federal consequence management activities after the Oklahoma City bombing In analyzing the lessons learned after the bombing FEMA identified three major actions that needed to be taken 1 create guidance to facilitate agencies coordinated response to terrorist events 2 ensure that state and local emergency plans terrorism the Federal Response Plan and 3 establish an adequate number of emergency response teams to deal with mass casualties Improvements in these areas have been made across the board FEMA has updated the Federal Response Plan to address how federal agencies states and localities would work together to respond to an act of terrorism and states are increasingly modeling their emergency operations plans on the federal plan Also the number of teams available for emergency response to deal with mass casualties has doubled since 1995 In response to a PDD 39 requirement and to ensure that states are prepared to respond to a terrorist incident FEMA assessed states capabilities for consequence management in 1995 and set up a system to continue monitoring those capabilities In 1997 FEMA reported to the Congress and to the President that the states had the basic capabilities to respond to disasters but were not well prepared for a terrorist incident involving a weapon of mass destruction The agency has also expanded terrorism preparedness training grants and systematically incorporated terrorism preparedness courses into its emergency management curriculum On the federal level FEMA coordinates extensively with other involved agencies on key national level terrorism preparedness guidance and policy documents and on activities as required by PDDs 39 and 62 The agency also participates in numerous

operations and special events designed to enhance the security of domestic events *Federal Response to Domestic Terrorism Involving Weapons of Mass Destruction-training for First Responders* United States. Congress. House. Committee on National Security. Subcommittee on Military Research and Development,1998 *Incident Safety Officer; ISO-Student Manual* ,2004 *Risk Management Series: Safe Rooms and Shelters - Protecting People Against Terrorist Attacks* Federal Emergency Agency,U. S. Department Security,2013-01-26 This manual is intended to provide guidance for engineers architects building officials and property owners to design shelters and safe rooms in buildings It presents information about the design and construction of shelters in the work place home or community building that will provide protection in response to manmade hazards The information contained herein will assist in the planning and design of shelters that may be constructed outside or within dwellings or public buildings These safe rooms will protect occupants from a variety of hazards including debris impact accidental or intentional explosive detonation and the accidental or intentional release of a toxic substance into the air Safe rooms may also be designed to protect individuals from assaults and attempted kidnapping which requires design features to resist forced entry and ballistic impact This covers a range of protective options from low cost expedient protection what is commonly referred to as sheltering in place to safe rooms ventilated and pressurized with air purified by ultra high efficiency filters These safe rooms protect against toxic gases vapors and aerosols The contents of this manual supplement the information provided in FEMA 361 Design and Construction Guidance for Community Shelters and FEMA 320 Taking Shelter From the Storm Building a Safe Room Inside Your House In conjunction with FEMA 361 and FEMA 320 this publication can be used for the protection of shelters against natural disasters This guidance focuses on safe rooms as standby systems ones that do not provide protection on a continuous basis To employ a standby system requires warning based on knowledge that a hazardous condition exists or is imminent Protection is initiated as a result of warnings from civil authorities about a release of hazardous materials visible or audible indications of a release e g explosion or fire the odor of a chemical agent or observed symptoms of exposure in people Although there are automatic detectors for chemical agents such detectors are expensive and limited in the number of agents that can be reliably detected Furthermore at this point in time these detectors take too long to identify the agent to be useful in making decisions in response to an attack Similarly an explosive vehicle or suicide bomber attack rarely provides advance warning therefore the shelter is most likely to be used after the fact to protect occupants until it is safe to evacuate the building Two different types of shelters may be considered for emergency use standalone shelters and internal shelters A standalone shelter is a separate building i e not within or attached to any other building that is designed and constructed to withstand the range of natural and manmade hazards An internal shelter is a specially designed and constructed room or area within or attached to a larger building that is structurally independent of the larger building and is able to withstand the range of natural and manmade hazards Both standalone and internal shelters are intended to provide emergency refuge for occupants of commercial office buildings

school buildings hospitals apartment buildings and private homes from the hazards resulting from a wide variety of extreme events The shelters may be used during natural disasters following the warning that an explosive device may be activated the discovery of an explosive device or until safe evacuation is established following the detonation of an explosive device or the release of a toxic substance via an intentional aerosol attack or an industrial accident Standalone community shelters may be constructed in neighborhoods where existing homes lack shelters Community shelters may be intended for use by the occupants of buildings they are constructed within or near or they may be intended for use by the residents of surrounding or nearby neighborhoods or designated areas
