From Sensing to Sentience Todd E. Feinberg, 2024-10-01 A new theory of Neurobiological Emergentism that explains how sentience emerges from the brain Sentience is the feeling aspect of consciousness In *From Sensing to Sentience* Todd Feinberg develops a new theory called Neurobiological Emergentism NBE that integrates biological neurobiological evolutionary and philosophical perspectives to explain how sentience naturally emerges from the brain Emergent properties are broadly defined as features of a complex system that are not present in the parts of a system when they are considered in isolation but may emerge as a system feature of those parts and their interactions Tracing a journey of billions of years of evolution from life to the basic sensing capabilities of single celled organisms up to the sentience of animals with advanced nervous systems including all vertebrates for instance fish reptiles birds and mammals arthropods insects and crabs and cephalopods such as the octopus Feinberg argues that sentience gradually but eventually emerged along diverse evolutionary lines with the evolution of sufficiently neurobiologically complex brains during the Cambrian period over 520 million years ago Ultimately Feinberg argues that viewing sentience as an emergent process can explain both its neurobiological basis as well its perplexing personal nature thus solving the historical philosophical problem of the apparent explanatory gap between the brain and experience

Lucid Dreaming Celia Green, Charles McCreery, 2013-11-26 Lucid dreams are dreams in which a person becomes aware that they are dreaming They are different from ordinary dreams not just because of the dreamer's awareness that they are dreaming but because lucid dreams are often strikingly realistic and may be emotionally charged to the point of elation Celia Green and Charles McCreery have written a unique introduction to lucid dreams that will appeal to the specialist and general reader alike The authors explore the experience of lucid dreaming relate it to other experiences such as out of the body experiences to which they see it as closely related and apparitions and look at how lucid dreams can be induced and controlled They explore their use for therapeutic purposes such as counteracting nightmares Their study is illustrated throughout with many case histories
