Wokeck,1999-04-01 American historians have long been fascinated by the peopling of North America in the seventeenth century Who were the immigrants and how and why did they make their way across the ocean Most of the attention however has been devoted to British immigrants who came as free people or as indentured servants primarily to New England and the Chesapeake and to Africans who were forced to come as slaves Trade in Strangers focuses on the eighteenth century when new immigrants began to flood the colonies at an unprecedented rate Most of these immigrants were German and Irish and they were coming primarily to the middle colonies via an increasingly sophisticated form of transport Wokeck shows how first the German system of immigration and then the Irish system evolved from earlier haphazard forms into modern mass transoceanic migration At the center of this development were merchants on both sides of the Atlantic who organized a business that enabled them to make profitable use of underutilized cargo space on ships bound from Europe to the British North American colonies This trade offered German and Irish immigrants transatlantic passage on terms that allowed even people of little and modest means to pursue opportunities that beckoned in the New

World Trade in Strangers fills an important gap in our knowledge of America's immigration history. The eighteenth century changes established a model for the better known mass migrations of the nineteenth and twentieth centuries which drew wave after wave of Europeans to the New World in the hope of making a better life than the one they left behind, a story that is familiar to most modern Americans. **Archiv für Familiengeschichtsforschung**, 2000 **American Book Publishing Record**, 1997-05 *Pennsylvania Folklife*, 1949 **German-American Relations and German Culture in America** Arthur R. Schultz, 1984. This work is organized by subject. Materials are grouped under twelve main sections in the body of the work with appropriate subdivisions and subtopics within each main subject. Each section is assigned a two letter designation and entries are numbered consecutively within each section. This subject code system was designed to facilitate referrals from the Index to the main body of the text and to allow for cross referencing between sections. Introduction
