Eminent Chemists Of Our Time 2nd Edition:

Lives and Times of Great Pioneers in Chemistry (Lavoisier to Sanger) Chintamani Nagesa Ramachandra Rao, Indumati Rao, 2015-11-18 Chemical science has made major advances in the last few decades and has gradually transformed into a highly multidisciplinary subject that is exciting academically and at the same time beneficial to human kind. In this context we owe much to the foundations laid by great pioneers of chemistry who contributed new knowledge and created new directions. This book presents the lives and times of 21 great chemists starting from Lavoisier 18th century and ending with Sanger. Then there are stories of the great Faraday 19th century and of the 20th century geniuses G N Lewis and Linus Pauling. The material in the book is presented in the form of stories describing important aspects of the lives of these great personalities besides highlighting their contributions to chemistry. It is hoped that the book will provide enjoyable reading and also inspiration to those who wish to understand the secret of the creativity of these great chemists. **The**

In 1869 the Russian chemist Dmitri Ivanovich Mendeleev organized the discord of the elements into the periodic table assigning each element to a row with each row corresponding to an elemental category. The underlying order of matter hitherto only dimly perceived was suddenly clearly revealed. This is the first English language collection of Mendeleev's most important writings on the periodic law. Thirteen papers and essays divided into three groups reflect the period corresponding to the initial establishment of the periodic law: three papers 1869-71 a period of priority disputes and experimental confirmations; five papers 1871-86 and a final period of general acceptance for the law and increasing international recognition for Mendeleev; five papers 1887-1905. A single easily accessible source for Mendeleev's principle papers, this volume offers a history of the development of the periodic law written by the law's own founder.
