Why Do They Make Things so Complicated? Lisa Monika Anna Mützel, 2017-05-05 In the past 50 years consumers buying situations have not become easier Consumers remain easily overwrought by complex buying situations that involve buying complex products or services such as laptops or insurances In such situations consumers find it difficult to make a decision and must spend high levels of cognitive effort on it Prior consumer research has addressed the

complexity of buying situations in several research streams such as in choice complexity or product complexity literature. However, previous researchers have not reached consensus on what constitutes the complexity of a buying situation. Furthermore, they have mostly concentrated on cognitive constructs and emotional constructs have been rather unexplored. To close these research gaps, this dissertation provides an in-depth conceptualization of complex buying situations by developing a comprehensive reference framework. Furthermore, this dissertation differs from prior research by examining in detail negative emotional responses to complexity. NERCO: A reliable and valid NERCO scale is developed that consists of two factors: emotional resignation and fear of post-purchase dissonance. An experiment investigates the influence of two input variables of the reference framework: 1) the number of alternatives in the consumer's price class and 2) the perceived expertise of the salesperson who provides a recommendation in a buying situation on perceived choice complexity and on NERCO. This dissertation paves the way for numerous directions for future research on the complexity of buying situations by providing theoretical fundamentals in the form of a detailed conceptualization and by precisely defining the research gaps.

Creating Images and the Psychology of Marketing Communication Lynn R. Kahle, Chung-Hyun Kim, 2006-08-15 This book based on a conference in Seoul, Korea in 2004 examines the image research in 3 parts under the theory of brand attachment. The 3 parts are: Theories of Image, Country Image and Individual and Celebrity Source Image. **The Paradox Planet** Larry Light, Joan Kiddon, 2017-07-18 Beginning with the Age of We in the 1950s and moving to the Age of Me to today the Age of I, this book examines how polarization and anger has changed how companies must manage their brands. Larry Light and Joan Kiddon, the leaders of Arcature LLC consultants in brand management, examine societal changes and global, local, and personal forces through the lens of marketers. They explain how to leverage paradox promises into brand-focused strategies and actions that create a pathway to profitability, create extraordinary brand experiences for individuals and communities, and build strong brands in a world of contradictory needs and benefits. In today's world, people want their individuality to be recognized but they also want to belong to a group that shares their distinctiveness. People want to be independent and interconnected, which is the underlying paradox affecting how we make decisions today. Navigate how to satisfy conflicting needs and look beyond single-minded solutions with the insights and guidance in **The Paradox Planet**. **Measurement Error and Research Design** Madhu Viswanathan, 2005-02-10 Measurement Error and Research Design is an ideal text for research methods courses across the social sciences, especially those in which a primer on measurement is needed. For the novice researcher, this book facilitates understanding of the basic principles required to design measures and methods for empirical research. For the experienced researcher, this book provides an in-depth analysis and discussion of the essence of measurement error and the procedures to minimize it. Most important, the book's unique approach bridges measurement and methodology through clear illustrations of the intangibles of scientific research. **BOOK JACKET** **Theoretical Foundations of Law and Economics** Mark D. White, 2008-12-22 The economic approach to law or law and economics is by
