*Methodological Reflections on Women's Contribution and Influence in the History of Philosophy* Sigridur

Thorgeirsdottir, Ruth Edith Hagengruber, 2020-07-11 This book introduces methodological concepts aimed at including women in the canon of the history of philosophy The history of women philosophers is as long and strong as the history of philosophy and this holds true not only for the European tradition as the research of women philosophers of the past shows The phenomenon of ignoring and excluding women in 19th and 20th century views on the history of philosophy was a result of the patriarchal tradition that ostracized women in general In this book leading feminist philosophers discuss methodologies for including women thinkers in the canon and curricula of philosophy How does the recovery of women thinkers and their philosophies change our view of the past and how does a different view of the past affect us in the present Studying a richer and more pluralistic history of philosophy presents us with worlds we have never entered and have never been able to approach This book will appeal to philosophers and intellectual historians wanting to view the history of philosophy in a new light and who are in favor of an inclusive perspective on that history **Why Women Buy** Dawn

**1945** Frank Biess, Daniel M. Gross, 2024-05-31 Through the first half of the twentieth century emotions were a legitimate object of scientific study across a variety of disciplines After 1945 however in the wake of Nazi irrationalism emotions became increasingly marginalized and postwar rationalism took central stage Emotion remained on the scene of scientific and popular study but largely at the fringes as a behavioral reflex or as a concern of the private sphere So why by the 1960s had the study of emotions returned to the forefront of academic investigation In *Science and Emotions after 1945* Frank Biess and Daniel M. Gross chronicle the curious resurgence of emotion studies and show that it was fueled by two very different sources social movements of the 1960s and brain science A central claim of the book is that the relatively recent neuroscientific study of emotion did not initiate but instead consolidated the emotional turn by clearing the ground for multidisciplinary work on the emotions *Science and Emotions after 1945* tells the story of this shift by looking closely at scientific disciplines in which the study of emotions has featured prominently including medicine psychiatry neuroscience and the social sciences viewed in each case from a humanities perspective **Reflections on Anger** Christa
