Professionalism in Medicine Jill Thistlethwaite, Dr John Spencer, 2018-10-08 Those at the grassroots of primary care have been provided with a unique opportunity to plan and shape the modern NHS This book describes the work of primary care groups in their first months and describes everything from the initial aims of PCGs through to primary care trusts and the future The excellent panel of contributors who are practised members of PCGs describe their experiences and the lessons they have learnt The book explores how organisations will evolve and provides guidance on theory people and functions It is essential reading for members of PCG teams and those with or aspiring to PCT status

Getting Doctors to Listen Philip J. Boyle, 1998-01-01 This book examines why physicians are often surprisingly reluctant to follow guidelines for treating patients based on research data It assesses the merits of these concerns which include worries about legal liability financial incentives the scientific validity of the data and the objectivity of the issuer of the guidelines It also proposes ways of developing more useful data and more effective guidelines that would reduce their objections

Empathy and the Practice of Medicine Howard Marget Spiro, 1993 A collection of essays written by physicians philosophers and a nurse seeks to restore empathy to medical practice describing how empathy is lost during a medical education and how this can be remedied

Empathy and the Practice of Medicine Howard Marget Spiro, Mary G. McCrea Curnen, Enid Peschel, Deborah St. James, 1993-01-01 The book which includes essays by physicians philosophers and a nurse is divided into three parts one deals with how empathy is weakened or lost during the course of medical education and suggests how to remedy this another describes the historical and philosophical origins of empathy and provides arguments for and against it and a third section offers compelling accounts of how physicians empathy for their patients has affected their own lives and the lives of those in their care We hear for example from a physician working in a hospice who relates the ways that the staff try to listen and respond to the needs of the dying a scientist who interviews candidates for medical school and tells how qualities of empathy are undervalued by selection committees a nurse who considers what nursing can teach physicians about empathy another physician who ponders whether the desire to be empathic can hinder the detachment necessary for objective care and several contributors who show how literature and art can help physicians to develop empathy

New Jerusalem Daniel Easterman, 1992 From Detached Concern to Empathy Jodi Halpern, 2001-05-10 Physicians recognize the importance of patients emotions in healing yet believe their own emotional responses represent lapses in objectivity Patients complain that physicians are too detached Halpern argues that by empathizing with patients rather than detaching physicians can best help them Yet there is no consistent view of what precisely clinical empathy involves This book challenges the traditional assumption that empathy is either purely intellectual or an expression of sympathy Sympathy according to many physicians involves over identifying with patients threatening

objectivity and respect for patient autonomy How can doctors use empathy in diagnosing and treating patients without jeopardizing objectivity or projecting their values onto patients Jodi Halpern a psychiatrist medical ethicist and philosopher develops a groundbreaking account of emotional reasoning as the core of clinical empathy She argues that empathy cannot be based on detached reasoning because it involves emotional skills including associating with another person's images and spontaneously following another's mood shifts Yet she argues that these emotional links need not lead to over-identifying with patients or other lapses in rationality but rather can inform medical judgement in ways that detached reasoning cannot For reflective physicians and discerning patients this book provides a road map for cultivating empathy in medical practice For a more general audience it addresses a basic human question how can one person's emotions lead to an understanding of how another person is feeling
