The Age of Intoxication Benjamin Breen, 2019-11-22 Eating the flesh of an Egyptian mummy prevents the plague Distilled poppies reduce melancholy A Turkish drink called coffee increases alertness Tobacco cures cancer Such beliefs circulated in the seventeenth and eighteenth centuries an era when the term drug encompassed everything from herbs and spices like nutmeg cinnamon and chamomile to such deadly poisons as lead mercury and arsenic In *The Age of Intoxication* Benjamin Breen offers a window into a time when drugs were not yet separated into categories illicit and licit recreational and medicinal modern and traditional and there was no barrier between the drug dealer and the pharmacist Focusing on the Portuguese colonies in Brazil and Angola and on the imperial capital of Lisbon Breen examines the process by which novel drugs were located commodified and consumed He then turns his attention to the British Empire arguing that it owed much of its success in this period to its usurpation of the Portuguese drug networks From the sickly sweet tobacco that helped finance the Atlantic slave trade to the cannabis that an East Indies merchant sold to the natural philosopher Robert Hooke in one of the earliest European coffeehouses Breen shows how drugs have been entangled with science and empire from the very beginning Featuring numerous illuminating anecdotes and a cast of characters that includes merchants slaves shamans prophets inquisitors and alchemists *The Age of Intoxication* rethinks a history of drugs and the early drug trade that has too often been framed as opposites between medicinal and recreational legal and illegal good and evil Breen argues that in order to guide drug policy toward a fairer and more informed course we first need to understand who and what set the global drug trade in motion

Imperial Twilight Stephen R. Platt, 2019-04-23 As China reclaims its position as a world power *Imperial Twilight* looks back to tell the story of the country's last age of ascendancy and how it came to an end in the nineteenth century Opium War As one of the most potent turning points in the country's modern history the Opium War has since come to stand for everything that today's China seeks to put behind it In this dramatic epic story award winning historian Stephen Platt sheds new light on the early attempts by Western traders and missionaries to open China even as China's imperial rulers were struggling to manage their country's decline and Confucian scholars grappled with how to use foreign trade to China's advantage The book paints an enduring portrait of an immensely profitable and mostly peaceful meeting of civilizations that was destined to be shattered by one of the most shockingly unjust wars in the annals of imperial history Brimming with a fascinating cast of British Chinese and American characters this riveting narrative of relations between China and the West has important implications for today's uncertain and ever changing political climate

Patrick O'Brian's Bodies at Sea Michael Leigh Sinowitz, 2014-07-18 An exploration of the complex roles that bodies both literally and figuratively play in the 21 volume Aubrey Maturin series reveals much about the novels many meditations on mind and body Beginning with a consideration of genre norms and the bodies of the novels main characters the book s focus shifts to the ways the series offers interconnections between the human body and history More literal considerations of the body examine O Brian s depictions of drug use particularly the opium addiction that afflicts Stephen Maturin and human sexuality in its many guises The work then focuses on Desolation Island the fifth novel in the series in light of the discussions above but also in terms of political and psychological tropes that draw upon the relationship of mind and body Questions are examined about the relationship of reader to author and what sustains such a long narrative and what continues to bring a reader back again and again *Narcotic Culture* Frank Dikötter, Lars Laamann, Zhou Xun, 2004-04-16 To this day the perception persists that China was a civilization defeated by imperialist Britain s most desirable trade commodity opium a drug that turned the Chinese into cadaverous addicts in the iron grip of dependence Britain in an effort to reverse the

damage caused by opium addiction launched its own version of the war on drugs which lasted roughly sixty years from 1880 to World War II and the beginning of Chinese communism But as *Narcotic Culture* brilliantly shows the real scandal in Chinese history was not the expansion of the drug trade by Britain in the early nineteenth century but rather the failure of the British to grasp the consequences of prohibition In a stunning historical reversal Frank Dik ter Laarmann and Zhou Xun tell this different story of the relationship between opium and the Chinese They reveal that opium actually had few harmful effects on either health or longevity in fact it was prepared and appreciated in highly complex rituals with inbuilt constraints preventing excessive use Opium was even used as a medicinal panacea in China before the availability of aspirin and penicillin But as a result of the British effort to eradicate opium the Chinese turned from the relatively benign use of that drug to heroin morphine cocaine and countless other psychoactive substances *Narcotic Culture* provides abundant evidence that the transition from a tolerated opium culture to a system of prohibition produced a cure that was far worse than the disease Delving into a history of drugs and their abuses *Narcotic Culture* is part revisionist history of imperial and twentieth century Britain and part sobering portrait of the dangers of prohibition *The Strange Genius of Mr. O* Carolyn

Eastman,2020-12-11 When James Ogilvie arrived in America in 1793 he was a deeply ambitious but impoverished teacher By the time he returned to Britain in 1817 he had become a bona fide celebrity known simply as Mr O counting the nation's leading politicians and intellectuals among his admirers And then like so many meteoric American luminaries afterward he fell from grace *The Strange Genius of Mr O* is at once the biography of a remarkable performer a gaunt Scottish orator who appeared in a toga and a story of the United States during the founding era Ogilvie's career featured many of the hallmarks of celebrity we recognize from later eras glamorous friends eccentric clothing scandalous religious views narcissism and even an alarming drug habit Yet he captivated audiences with his eloquence and inaugurated a golden age of American oratory Examining his roller coaster career and the Americans who admired or hated him this fascinating book renders a vivid portrait of the United States in the midst of invention **Cannabis Britannica** James H. Mills,2003-09-11

Cannabis Britannica explores the historical origins of the UK's legislation and regulations on cannabis preparations before 1928 It draws on published and unpublished sources from the seventeenth century onwards from archives in the UK and India to show how the history of cannabis and the British before the twentieth century was bound up with imperialism James Mills argues that until the 1900s most of the information and experience gathered by British sources were drawn from colonial contexts as imperial administrators governed and observed populations where use of cannabis was extensive and established This is most obvious in the 1890s when British anti opium campaigners in the House of Commons seized on the issue of Government of India excise duties on the cannabis trade in Asia in order to open up another front in their attacks on imperial administration The result was that cannabis preparations became a matter of concern in Parliament which accordingly established the Indian Hemp Drugs Commission The story in the twentieth century is of the momentum behind moves to

include cannabis substances in domestic law and in international treaties The latter was a matter of the diplomatic politics of imperialism as Britain sought to defend its cannabis revenues in India against American and Egyptian interests The domestic story focuses on the coming together of the police the media and the pharmaceutical industry to form misunderstandings of cannabis that forced it onto the Poisons Schedule despite the misgivings of the Home Office and of key medical professionals The book is the first full history of the origins of the moments when cannabis first became subjected to laws and regulations in Britain
