*The SAGE Handbook of Qualitative Business and Management Research Methods* Catherine Cassell, Ann L Cunliffe, Gina Grandy, 2021-08-04 The SAGE Handbook of Qualitative Business and Management Research Methods provides a state of the art overview of qualitative research methods in the business and management field The Handbook celebrates the diversity of the field by drawing from a wide range of traditions and by bringing together a number of leading international researchers engaged in studying a variety of topics through multiple qualitative methods The chapters address the philosophical underpinnings of particular approaches to research contemporary illustrations references and practical guidelines for their use The two volumes therefore provide a useful resource for Ph D students and early career researchers interested in developing and expanding their knowledge and practice of qualitative research In covering established and emerging methods it also provides an invaluable source of information for faculty teaching qualitative research methods The contents of the Handbook are arranged into two volumes covering seven key themes Volume One History and Tradition Part One Influential Traditions underpinning qualitative research positivism interpretivism pragmatism constructionism critical poststructuralism hermeneutics postcolonialism critical realism mixed methods grounded theory feminist and indigenous approaches Part Two Research Designs

Jaswal ,Desiree Forsythe,2024-09-24 Research demonstrates that STEM disciplines perpetuate a history of exclusion particularly for students with marginalized identities This poses problems particularly when science permeates every aspect of contemporary American life Institutions repeated failures to disrupt systemic oppression in STEM has led to a mostly white cisgender and male scientific workforce replete with implicit and or explicit biases Education holds one pathway to disrupt systemic linkages of STEM oppression from society to the classroom Maintaining views on science as inherently objective isolates it from the world in which it is performed STEM education must move beyond the transactional approaches to transformative environments manifesting respect for students social and educational capital We must create a STEM environment in which students with marginalized identities feel respected listened to and valued We must assist students in understanding how their positionality privilege and power both historically and currently impacts their meaning making and understanding of STEM
