Nichols,N. Sugur,2004-03-25 Little discussion about globalization has concerned one of the truly global forces the management of multi national and large domestic corporations and the significance of modern management practices for workers in the developing world This book examines the nature of work in the modern corporate sector in Turkey with special reference to three industries white goods cars and textiles Based on extensive interviews it questions some common assumptions in the modern western social science literature especially in North America and Britain      **The Turkish Economy** Sumru Altug,Alpay Filiztekin,2006 Including contributions from noted international scholars this collection of papers provides a strong theoretical and empirical underpinning for the discussion of major public policy issues facing Turkey today Matters addressed include determinants of growth and productivity education and human capital accumulation income inequality corporate control and government

performance of the government sector impact of major public policy issues on the future growth prospects of the Turkish economy This volume relates the impact of major public policy issues on the future growth prospects of the Turkish economy At a time when Turkey is currently attempting to gain membership to the European Union this pertinent reference questions whether the country's economy is in fact ready for EU accession and membership *Working Class Formation in Turkey, 1946-1962* Barış Alp Özden, 2024-02-02 The political identities of the Turkish working class began a transformative journey that started during a period of industrialization following World War II and continued until the military interventions of 1960 *Working Class Formation in Turkey* addresses common structural generalizations to recover the complex history of developing political recreational familial residential and work related lives of Turkish workers Drawing on a wide range of historical sources this volume brings the concept of everydayness to the fore and uncovers the local contexts that fostered class solidarity examines labor practices that fueled radicalism and analyzes the shifting dynamics of industrial discipline that impacted working class identity and culture **Economically Active Population, Employment, Unemployment and Hours of Work (household Surveys).** ,1990 **The Feminist Economics of Trade** Irene van Staveren, Diane Elson, Caren Grown, Nilufer Cagatay, 2012-08-06 Unravelling the complex relationship between gender inequality and trade this is the first book to combine the tools of economic and gender analysis to examine the relationship between international trade and gender relations It brings together fourteen contributions from a variety of economic perspectives including structuralist institutionalist neoclassical and Post Keynesian by a range of authors including Lourdes Bener a William Darity Marzia Fontana and Mariama Williams to demonstrate what feminist economics has contributed to the analysis of international trade through theoretical modelling econometric analysis and policy oriented contributions It includes evidence from industrialized semi industrialized and agrarian economies using country case studies and cross country analysis Arguing that trade expansion and reduction of gender inequality can be combined but only if an appropriate mix and sequence of trade and other economic policies is implemented this book is key reading for all students of international economics gender and cultural studies and politics and international relations amongst other disciplines *Disinflation, Fiscal Sustainability, and Labor Market Adjustment in Turkey* Pierre-Richard Agénor, Pierre Richard Agenor, 2006 This paper analyzes the effects of monetary policy and fiscal adjustment on output and unemployment in Turkey The model on which the analysis is based accounts for rural urban migration a large urban informal sector flexible exchange rates a dollarized banking system and interactions between default risk on government liabilities credibility and inflation expectations The short and long run effects of a rise in official interest rates and tax increases are analyzed The results highlight the importance of accounting for the link between default risk and credibility in understanding the real and financial effects of macroeconomic adjustment Turkey-EU Relations Kenan Aksu, 2013-01-04 This book attempts to introduce the untold story of the positive aspects of EU Turkey relations from historical backgrounds to international impacts and from farming to

cooperation against international terrorism Turkey EU relations are sometimes easy to observe but at the same time very complicated and difficult to understand On the one hand the EU does not want to lose its long term ally s interest in joining the Union but on the other hand it does not want a vast Muslim country with its huge young population to change the EU s already struggling dynamics The New Turkey on the other side does not want to let itself down by trying to join the Union at any cost It wants to join the Union but stay as a Democratic Muslim Turkey rather than a Democratic European Turkey Both in Turkey and in the EU though members of the public have very mixed feelings towards this relationship as their perceptions are shaped by the ideological interpretations of their leaders For example people who travel to Turkey or Europe have a completely different understanding of the relations than the ones who only hear it from politicians Therefore mutual positive aspects are either underestimated or completely missed This book aims to fill some of those missed gaps *Islamic Political Identity in Turkey* M. Hakan Yavuz, 2003-08-28 In November of 2002 the Justice and Development Party swept to victory in the Turkish parliamentary elections Because of the party s Islamic roots its electoral triumph has sparked a host of questions both in Turkey and in the West Does the party harbor a secret Islamist agenda Will the new government seek to overturn nearly a century of secularization stemming from Kemal Ataturk s early twentieth century reforms Most fundamentally is Islam compatible with democracy In this penetrating work M Hakan Yavuz seeks to answer these questions and to provide a comprehensive analysis of Islamic political identity in Turkey He begins in the early twentieth century when Kemal Ataturk led Turkey through a process of rapid secularization and crushed Islamic opposition to his authoritarian rule Yavuz argues that since Ataturk s death in 1938 however Turkey has been gradually moving away from his militant secularism and experiencing a quiet Muslim reformation Islamic political identity is not homogeneous says Yavuz but can be modern and progressive as well as conservative and potentially authoritarian While the West has traditionally seen Kemalism as an engine for reform against reactionary political Islam in fact the Kemalist establishment has traditionally used the Islamic threat as an excuse to avoid democratization and thus hold on to power Yavuz offers an account of the soft coup of 1997 in which the Kemalist military bureaucratic establishment overthrew the democratically elected coalition government which was led by the pro Islamic Refah party He argues that the soft coup plunged Turkey into a renewed legitimacy crisis which can only be resolved by the liberalization of the political system The book ends with a discussion of the most recent election and its implications for Turkey and the Muslim world Yavuz argues that Islamic social movements can be important agents for promoting a democratic and pluralistic society and that the Turkish example holds long term promise for the rest of the Muslim world Based on extensive fieldwork and interviews this work offers a sophisticated new understanding of the role of political Islam in one of the world s most strategically important countries **External Liberalization in Asia, Post-Socialist Europe, and Brazil** Lance Taylor, 2006-02-02 This book reviews the experience of 14 countries with external liberalization and related policies based on papers which follow a common macroeconomic methodology The authors of these

papers trace shifts in the productivity and employment at the country level      **Public-private Employment Choice, Wage Differentials and Gender in Turkey** Aysit Tansel,1999      *Women Workers in Turkey* Saniye Dedeoglu,2007-10-24

Globalisation is a great generator of jobs but one that does not protect those at the bottom of the labour supply chain Saniye Dedeoglu s compelling study of women workers in Istanbul s garment industry shows exactly how globalisation has affected women engaged in insecure invisible and low or unpaid work She reveals how industries have adapted their labour demands to make use of local female labour supplies and highlights the strategies and responses that have evolved in response to contemporary changes in global industrial production in Turkey Dedeoglu shows how production for global markets has seeped into local labour markets contributing to a culture of work which is informal and so throws up the critical question of what it means to be a woman in today s globalised society This book illuminates key issues in sociology and gender studies and makes an important contribution to the social and economic consequences of globalisation for the least privileged in industrial societies      **Turkey and the Global Economy** Ziya Onis,Fikret Senses,2009-10 Since the financial crisis of 2000 and 2001 the Turkish economy has undergone considerable change and some improvement This book gives a detailed examination of the neo liberal restructuring that has taken place and the challenges the economy still faces providing a comparative perspective on recent reforms and the position of Turkey in the global economy This book examines all major aspects of the post crisis economic performance of the Turkish economy Major sectors of the economy such as agriculture and manufacturing along with key issues such as privatization export growth developments in the labour market poverty and social exclusion are analysed in detail The authors consider Turkish performance from a comparative perspective drawing attention to its similarities with the experience of other emerging markets Providing an insight into the major difficulties of post crisis adjustment sustainability of the gains achieved so far and the challenges that lie ahead this book will be of interest to academics and scholars in the fields of International Political Economy and Globalization Studies Middle East Studies and Development Studies as well as having significance for practitioners in emerging markets      **Research Handbook on New Frontiers of Equality and Diversity at Work** Klarsfeld, Alain,Knappert, Lena,Kornau, Angela,Ng, Eddy S.,Ngunijiri, Faith W.,2022-01-18 Spanning five continents this cutting edge book provides a thorough international overview of equality diversity and inclusion at work Analysing the demographics of the workplace and the economic outcomes achieved by different segments of the population it offers readers a better understanding of diverse work environments and how they are influenced by legislation and populations      *METU Studies in Development* ,2007      **OECD Employment Outlook 2015** OECD,2015-07-09 The OECD Employment Outlook 2015 reviews recent labour market trends and short term prospects in OECD countries looking at recent labour market developments especially around minimum wages skills and wage inequality activation policies and inclusive labour markets and job quality      **Societal Peace and Ideal Citizenship for Turkey** Pinar Enneli,Rasim Özgür Dönmez,2011-08-16 Globalisation and neo liberalism have been impacting the nation state and leading

the full citizenship concept into crisis not only in Turkey but also in the world While one reason for this crisis is the decline of the welfare state another reason stems from the fluidity of borders that distorts the classical patterns of the nation state such as meta identity The existing Turkish citizenship inherited a strong state idea with passive citizenship tradition from the Ottoman Empire However this understanding is no longer sustainable for Turkish society The definition of citizenship through state led nationalism secularism and a free market economy creates societal crises in politics and society The aim of this book is to find out the answer of what should be the ideal citizenship regime for Turkey Various scholars dealing with Turkish socio politics analyze different aspects and problems of Turkish citizenship regime that should be tackled for finding a recipe for ideal citizenship in Turkey
