Employment-driven Industrial Relations Regimes The Singapore Experience:

Employment-driven Industrial Relations Regimes Soon Beng Chew, Rosalind Chew, 1995 This book looks at the introduction of economic constraint into industrial relations and examines whether a wage driven or employment driven industrial relations regime can be adopted or is applicable As the term implies the former regime produces more employment and generates a higher income for all workers in the long run while the latter obtains a wage premium for the employed at the expense of the unemployed Furthermore in a wage driven industrial relations regime the strength of the union is an important determinant of wages while there is no such contemporaneous relationship between union strength and wage increases in the employment driven regime The book examines the Singapore industrial relations system based on the resource constraint approach This book received a commendation in the 1996 Book Awards of Singapore

Employment Relations in the Growing Asian Economies Thomas Kochan, Russell Lansbury, Anil Verma, 2005-08-17 This book analyses the role of employment relations in the context of economic development in some of the key Asian economies China Hong Kong India Malaysia the Philippines Singapore South Korea and Taiwan In recent years these Asian economies have become increasingly more open and export driven and there is strong interest all over the world in the Asian economic miracle among practitioners and scholars alike Although much has been written on this region few books have concentrated on the human resource aspects of this growth The authors build on the basic premise that the initial success of these countries has lain in low wages and suppression of workers rights However they point out that as employment relations evolve enterprises will either pull out due to rising wages or stay and prosper by adapting to higher wages Cases are provided to illustrate both of these features The evidence in the book suggests that unless a synergy is created between firm level and state level human resource policies in areas such as skill formation and workers need for voice economic growth is unlikely to be sustainable

Labour Relations in the Global Fast-Food Industry Tony Royle, Brian Towers, 2004-08-02 The fast food industry is one of the few industries that can be described as truly global not least in terms of employment which is estimated at around ten million people worldwide This edited volume is the first of its kind providing an analysis of

labour relations in this significant industry focusing on multinational corporations and large national companies in ten countries the USA Canada the UK the Netherlands Germany Australia New Zealand Singapore and Russia The extent to which multinational enterprises impose or adapt their employment practices in differing national industrial relations systems is analysed Results reveal that the global fast food industry is typified by trade union exclusion high labour turnover unskilled work paternalistic management regimes and work organization that allows little scope for developing workers participation in decision making let alone advocating widely accepted concepts of social justice and workers rights

Human Capital Formation as an Engine of Growth Loong-Hoe Tan,1999 The East Asian countries have been relatively more advanced than other developing countries in the field of human capital development Even in the 1960s they managed to attain higher levels of human capital compared with other low and middle level economies in the developing world This volume examines the role of human capital formation in the rapid growth of the East Asian economies Apart from the formal education variable other factors such as better health care of the labour force nutritional status of the population and on the job training are important concerns that were not given sufficient attention in the 1993 World Bank study The East Asian Miracle This present volume offers many insights of interest to policy makers and specialists with regard to developing and transitional economies

Southeast Asia in the Global Economy Helen E S Nesadurai,J Soedradjad Djiwandono,2009 While economic globalization benefited Southeast Asia especially during the 1990s boom the region now seems to be caught between two emerging economic giants China and India What challenges and opportunities does the rise of China and India pose for Southeast Asia and how should policy makers respond Are bilateral free trade arrangements and bilateral economic partnerships a boon or bane for competitiveness In identifying approaches and strategies to coping with these challenges and leveraging on the opportunities available this book also links the quest for competitiveness with the necessity of social protection The link comes in the form of the people who work for firms as human resources and as users and innovators of technology The book acknowledges and discusses the problems of inadequate technological and innovative capacity and the problems of managing labour productivity in Southeast Asia However the book also cautions against focusing on people solely as productive labour whether in production or the knowledge sector By highlighting the adverse social economic and political consequences of ignoring social protection issues and challenging the myth that addressing social protection undermines competitiveness the book emphasizes the social responsibilities incumbent on governments and firms in this age of growing economic insecurities

This book serves as a textbook on labour economics and public policy in labour markets. It also shows how Singapore has been successful in establishing a world class labour market. One attribute of such a labour market is the high purchasing power of wages for the average worker for essentials such as housing, healthcare, quality education for children and retirement consumption which motivates Singaporeans to work hard. The second attribute is a macro focused labour union that works closely with the government and is able to prevent excessive wage increase. *Democracy and Development* R.C. Bhardwaj, K.

Vijayakrishnan, 2018-10-26. Published in 1998. The question of whether democracy and development are allies or adversaries has long been debated and with the triumph of the democratic spirit worldwide the relationship between democracy and development has once again come to attract much attention globally. The collapse of the Soviet Union and the developments in Eastern Europe led to considerable rethinking in political circles on the efficacy of the economic policies pursued in those countries and the long term viability of political systems prevalent there. Elsewhere several newly industrialized countries are striving to consolidate their gains though there are differing perceptions of whether their politics conform to the classical framework of democracy or not. In a remarkable turn around some other countries have initiated measures for economic reforms and structural adjustment setting aside their earlier approaches towards economic management. In short the last decades of this millennium have witnessed meaningful efforts worldwide on forging a new partnership between democracy and development. In February 1996 the Commonwealth Parliamentary Association jointly organized a conference entitled Parliamentary Democracy and Development: Allies or Adversaries with the Wilton Park, an international agency of the British Commonwealth and Foreign Office in Wilton House, West Sussex, United Kingdom. The week long conference brought together parliamentarians, diplomats, administrators, political scientists, economists and specialists from all over the world. The participants shared their views and experiences on diverse aspects of the main theme. This publication presents an essentially parliamentary perspective on the correlation between democracy and development based on the discussions at the Wilton Park conference and in the light of current thinking on the subject matter. **Political, Economic And Social Dimensions**

Of Labour Markets: A Global Insight Soon Beng Chew, Lingli Huang, Kai Xiang Kwa, 2022-06-23. Why and how do politics, society and economics shape the growth and failure of labour markets? Does government intervention help or harm labour market reforms/adjustments in times of economic downturn? What forces drive such government intervention and do they differ from society to society? In addressing these big picture questions, this book's analytical scope is heavily centred around the topic of labour markets performance. The book argues that performance in labour markets across countries are influenced by their labour market policies. In turn, these policies are shaped in varying degrees by the country's politics. Each

chapter in this book dives into the labour market experiences in various countries to demonstrate why in some countries labour markets perform better than in other countries Major findings from this book suggest that countries can produce better economic and social outcomes e g lower socio economic inequality if their labour market policies are aimed at fostering a socially and politically stable society via greater equity in wealth distribution across various socio cultural and income groups This book is an essential read for any public policy researchers policy practitioners and undergraduate graduate students who are interested or vested in the topic of labour markets performance in the political social and economic dimensions Particularly this book provides a critical synthesis of the labour market experiences in many countries Hence the book serves as an ideational tool to advance future labour market research and policy
