International Journal of Human Development and Sustainability Vol.4, No.1 , 2011-09-28 **The Egyptian Labor Market** Caroline Krafft, Ragui Assaad, 2022-03-03 The Egyptian economy has faced many challenges in the decade since the 2011 Arab Spring uprisings Not only was job creation anaemic from 2012 to 2018 but new jobs were also of low quality characterized by informality and vulnerability to economic shocks These challenges pushed many in Egypt especially the most vulnerable into a more precarious labor market situation Then in the midst of economic recovery brought on by tough reform measures adopted in 2016 and 2017 the country was hit by the widespread disruption of a global pandemic

This book examines the plight of Egypt's most vulnerable groups by focusing on the intersection of gender and economic vulnerability in the labor market. With this emphasis on vulnerability and a lens that is sensitive to gender differences and inequities, the contributors to this volume use data from the most recent wave of a unique longitudinal survey to illuminate different aspects of Egyptians' lives. The aspects they explore include labor supply behavior, the ability to access good quality and well-paying jobs, the evolution of wages and wage inequality, the school-to-work transition of youth, the decline in public sector employment, international and internal migration, the situation of rural women, access to social protection, food security, vulnerability to shocks and coping mechanisms, health status, and access to health care services. These analyses are prescient in understanding the axes of vulnerability in Egyptian society that became all too salient during the COVID-19 pandemic.

Riddle of Employment Opportunities for Rural Women in Eastern Uttar Pradesh Dr. Sheela Yadav, 2024-02-02

In the 21st century, even after more than two decades have passed, the challenge of work division persists. Even if participation in work is achieved, the main cause of economic oppression seems to be unequal wages based on gender. For rural Indian women, the complexity generated during employment creates more problems than the availability of job opportunities itself. If these complexities are examined impartially, it's not just about unequal wages; rather, numerous factors emerge on social, political, religious, gender, and traditional bases that complicate their access to available opportunities and hinder easy living. Understanding these enigmas of employment, the subtle level of work performed by rural women is attempted to be explained in this book through detailed analysis. For this purpose, a survey and interview of women from various villages in the development block of Devkali in the Ghazipur district of Uttar Pradesh have been conducted. The effort to comprehend this reality with clarity has been carried out in different phases. In the inaugural chapter, an in-depth exploration of rural working women is undertaken, delving into their introduction and conceptual framework. This sets the stage for a comprehensive examination of their experiences and challenges. The second chapter delves into the extensive body of literature surrounding employment opportunities for rural women, offering a meticulous analysis that unravels the complexities of their professional landscape. This rigorous examination illuminates key trends and patterns. Chapter three provides a panoramic view of the study area, offering insights into its historical and geophysical background. By contextualizing the region, a deeper understanding of the dynamics shaping the employment landscape for rural women emerges. Moving forward, the fourth chapter meticulously scrutinizes the myriad obstacles and fluctuations that impact employment opportunities for rural women. Through a discerning lens, this chapter dissects the challenges that these women encounter on their professional journey. Chapter five navigates the intricate terrain of familial dynamics and societal attitudes toward women's workforce participation. By shedding light on these multifaceted aspects, a nuanced understanding of the broader ecosystem in which rural women operate is attained. In the ensuing chapter, the focus shifts to the formidable barriers posed by entrenched traditional values, virility, and patriarchal hegemony. These entrenched forces pose significant challenges to the advancement

of rural women in the workforce making this chapter a critical exploration of the prevailing socio cultural context The final chapter turns its attention towards wages work performance and the imperative work of safeguarding the rights of rural working women By dissecting these crucial facets this chapter seeks to fortify the foundations upon which the empowerment of rural women in the workforce stands
