Simplified Signs: A Manual Sign-Communication System for Special Populations, Volume 1. John D.

Bonvillian,Nicole Kissane Lee,Tracy T. Dooley,Filip T. Loncke,2020-07-30 Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages It is the culmination of over twenty years of research and development by the authors The Simplified Sign System has been

developed and tested for ease of sign comprehension memorization and formation by limiting the complexity of the motor skills required to form each sign and by ensuring that each sign visually resembles the meaning it conveys Volume 1 outlines the research underpinning and informing the project and places the Simplified Sign System in a wider context of sign usage historically and by different populations Volume 2 presents the lexicon of signs totalling approximately 1000 signs each with a clear illustration and a written description of how the sign is formed as well as a memory aid that connects the sign visually to the meaning that it conveys While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities cerebral palsy autism or aphasia it may also assist the communication needs of a wider audience such as healthcare professionals aid workers military personnel travellers or parents and children who have not yet mastered spoken language The system also has been shown to enhance learning for individuals studying a foreign language Lucid and comprehensive this work constitutes a valuable resource that will enhance the communicative interactions of many different people and will be of great interest to researchers and educators alike

StarBriefs 2001 ,2012-12-06 This compilation probably looks like one of the craziest things a human being could spend his or her time on Yet nobody would wonder at someone taking a short walk every day after twenty five years that person would have covered a surprisingly long distance This is exactly the story behind this list which appeared first as a few pages within the directory StarGuides or whatever name it had at that time and as a distinct sister publication since 1990 The idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations acronyms contractions and symbols which they might encounter in all aspects of the vast range of their professional activities including traveling Perhaps it is a bit paradoxical but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline they will probably encounter more difficulties when dealing with adjacent fields It is for this purpose that this dictionary might be most often used Scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions

24: *What Can Happen in A Day* Michael Ford Jr.,2018-07-05 Most people know that firefighting is an incredibly dangerous profession The popular perception of firefighters is that they are fearless heroes who put their lives on the line to rescue people from burning buildings That perception is mostly true But there is so much more about firefighters and their community labor that is rarely revealed 24 What Can Happen in a Day is a brilliant intimate look into the daily lives of firefighters from the experiences of Michael Ford Jr who rose through the ranks from raw recruit to assistant fire chief You will ride along with Chief Ford as he unveils the most interesting disturbing and adventurous firefighter escapades You ll laugh and wince in sympathy as Ford offers you a behind the scenes view into a world of secrets failures misfortune exhilaration and triumph You will cheer as you are encouraged to transcend perceived limitations to advance in life And more than anything you ll be enthralled as you experience the inspiring tragic shocking best
