Program Vitality in the United States Emily Heidrich Uebel, Felix A. Kronenberg, Scott Sterling, 2023-11-09 The perception of a permanent enrollment crisis in US postsecondary foreign language education has shaped our profession's image for an entire generation of educators Over the past 30 years this crisis rarely invited self examination or inspired creativity Instead it was routinely attributed to external factors shrinking budgets unsympathetic administrators disengaged students This volume is refreshingly optimistic After providing a nuanced picture of the complex enrollment situation and focusing on perceptions of language education among undergraduate students the volume features an inspiring panorama of successful models that revitalized language programs at a wide range of institutions The diversity of approaches to post secondary language education in the United States featured in this volume highlights that there are no simple one size fits all solutions To be transformational initiatives need to be intimately calibrated to the evolving needs and desires of our institutions most

Language Mixing in Infant Bilingualism Elizabeth Lanza, 2004 This book addresses the issue of language contact in the context of child language acquisition Elizabeth Lanza examines in detail the simultaneous acquisition of Norwegian and English by two first born children in families living in Norway in which the mother is American and the father Norwegian She connects psycholinguistic arguments with sociolinguistic evidence adding a much needed dimension of real language use in context to the psycholinguistic studies which have dominated the field She draws upon evidence from other studies to support her claims concerning language dominance and the child's differentiation between the two languages in relation to the situation interlocutor and the communicative demands of the context She also addresses the question of whether or not the language mixing of infant bilingualism is conceptually different from the

codeswitching of older bilinguals thus helping to bridge the gap between these two fields of study *Sign Language in Papua New Guinea* Adam Kendon, 2020-02-17 This book presents in revised form and as a single monograph three papers on a sign language from the Enga Province of Papua New Guinea Originally published in 1980 for more than twenty years these papers remained the only report of a sign language from that part of the world The detailed descriptive analyses that the author provided are still fresh today and in some respects they anticipate insights into the nature of sign languages that were not further explored until much more recently The monograph is accompanied by two essays Sherman Wilcox comments on value and relevance of the author's work in the light of much more recent work on the linguistics of sign languages An essay by Lauren Reed and Alan Rumsey provides an up to date survey of what is now known about sign languages in Papua New Guinea Information about sign languages in the Solomon Island is also included **Handbook of Natural Language**

Cliticization S.M. Powers, C. Hamann, 2013-04-17 This collection of papers investigates two specific linguistic phenomena from the point of view of first and second language acquisition While observations on the acquisition of scrambling or

pronominal clitics can be found in the literature up until the recent past they were sparse and often buried in other issues This volume fills a long existing gap in providing a collection of articles which focus on language acquisition but at the same time address the overarching syntactic issues involved for example the X bar status of clitics base generation vs movement accounts of scrambling This volume contains an overview of L1 and in one case L2 acquisition data from a number of different languages including Bernese Swiss German Dutch English French German Italian Spanish and Swedish as well as from several theoretical points of view with these two clause internal processes at its center These language acquisition data are considered to be crucial in the validation of analyses of these specific linguistic phenomena in adult grammars The contributions in this volume include the earliest thoughts in this vein and for this reason should be viewed as a starting point for discussions within theoretical linguistics and language acquisition alike
