Perioperative Nursing Linda Shields, Helen Werder, 2002-07 The field of perioperative nursing is a fast moving one. This comprehensive textbook is aimed at both the qualified or trainee nurse who has specialised or is thinking of specialising in perioperative care. The authors and editors are all experienced nurses and nurse educators who aim to provide easy to read and easy to find information about procedures conditions and nursing skills that a newcomer to the field may not be familiar with or with which he or she has only a superficial knowledge. Throughout the text much use is made of illustrations tables and boxes of key information and a comprehensive list of references is included at the end of each chapter.

Nursing Children Jayne Taylor, 1999 Incorporating legislation passed since 1991 this third edition adds more emphasis about the nature and scope of research in the field of nursing children. It includes a new chapter on children and hospital services which covers the material in the revised DipHEN Nursing course. There is analysis of community care and its impact on how we care for children and discussion of new developments in technology and implications of skill mix service provision and

care management **The Hospitalized Child Psychosocial Issues** Dianna L. Akins, Gillian S. Mace, Faren R. Akins, 1981-09 The Hospitalized Child Psychosocial Issues is a comprehensive abstracted bibliography focusing on the behavioral and developmental consequences of short term long term or recurrent hospitalization during childhood and adolescence The emphasis of this volume is on the psychosocial issues related to the hospital experience environment rather than on adaptation to or coping with particular disease states or terminal illness Publications are included which identify potential problems of hospitalization coping mechanisms of patients parents and staff and possible solutions For example the articles covered in this volume discuss the trauma which may result from the child's separation from mother family peers anxiety over medical procedures unfamiliarity of the hospital environment absence from school restrictions on physical activity forced dependency and concerns over body image The search for solutions to adaptation difficulties often results in the creation of new hospital programs These too are reviewed in this bibliography Examples include child life programs the care by parent units foster grandparent surrogate mother programs and hospital or surgical orientation programs New therapeutic approaches have been attempted in a hospital setting including bibliotherapy puppet therapy play therapy and mutual story telling techniques Each of these innovations is represented in the bibliography Further hospital redesign schemes are reviewed including the feasibility of separate adolescent wards And finally modification of hospital policy has been examined including establishment of liberal visiting privileges parent rooming in day v vi PREFACE surgery and improved communication between patient parent and hospital staff **Materials for Cancer Nursing Education: a Catalogue** Koba Associates, 1975 Over 500 references to books journal articles pamphlets and audiovisuals to be used by educators of nurses involved with cancer patients Directed toward nursing activity rather than to the disease itself Citations arranged under broad headings e.g Handling the child as a cancer patient Entry gives bibliographical information brief summary and when available intended audience Author producer title and subject indexes **Current Catalog** National Library of Medicine (U.S.), 1980 First multi year cumulation covers six years 1965-70 **Psychological and Behavioral Assessment** Phyllis R. Magrab, 2012-12-06 Over the last several decades the remarkable success of science and medical technology has allowed many children with chronic illness and handicapping conditions to live longer and healthier lives But this success is not without toll The human cost of chronic illness or a handicapping condition can be enormous for the child and the family For the family there is often the stressful daily burden of care fatigue marital stress low family morale financial burdens and reduced career mobility For the child there are often arduous and painful treatment regimes frequent school absences low energy periods and uncertainties with respect to future education and vocation The course of many diseases is unpredictable and the very fact of chronicity implies ongoing coping problems for the family and the child The impact of a chronic illness or handicapping condition on a family system is usually more disintegrative than integrative disrupting the lives of all family members and exacerbating the developmental risks to the child It is not surprising that a

recent comprehensive study for establishing public policies for children with chronic illness at Vanderbilt University has called attention to these factors and produced as a primary recommendation increased attention to the psychological impact of disease on the family and the child. In this context there is an important need for adequate assessment of psychological and behavioral problems in these children to plan for appropriate services.
