imaginative and embodied explorations of liberatory futures The chapters are united by a common commitment to heterotopic disturbance to contesting and subverting the anthropo capitalo centric space in which we live Each chapter approaches this subversion in its own way using prefiguration restorying speculation radical imagination and combinations thereof to disturb or shatter orders explore the kinds of liberation and resistance their disturbance demonstrates demands or embodies and ultimately illustrate exactly what would or could happen to all the animals Heterotopia Radical Imagination and Shattering Orders will appeal to scholars students and individuals interested not only in challenging normalised binaries hierarchies and orders of value both human and nonhuman but in creating and realising liberatory alternatives Scholar activists activists professionals working in animal advocacy and anyone undertaking activities aimed at radically changing how other animals are understood and used will also find inspiration new insights and information that enhance their current methods and approaches Some readers may also find simply confirmation and comfort in the knowledge that so many others are working in solidarity with the disordered belief that shattering the A IC is possible **Love YOU** Dinorah

Psychologically Informed Environments Dean Whittington PhD, 2016-11-16 Psychologically Informed Environments outlines the problems inherent in working with marginal populations such as the homeless The analysis considers the issue of masculinities and how these are erased within current academic discourses The key issue is around how emotional recovery is generated using therapeutic techniques based on praxis It also explores how organisations can be reconfigured to initiate emotional recovery and so stop people moving around the perpetual treadmill This needs to be undertaken by grounding the client in the present working on past traumas those which shape the current lifestyle whilst thinking about a sustainable future to move into This involves the therapist moving into the bath of steel the client inhabits The book sets out to explore some of the problems arising from past interventions and situating a move to an emotional recovery by rethinking current practices It raises considerable questions around training research and the style of the current set of interventions being undertaken All should be appraised on whether they generate emotional recovery This can be viewed by the use of case histories to depict the work undertaken and requires the use of phenomenological methods to detail the work
