Empirical Studies Of Commercial Policy:

Empirical Studies of Commercial Policy Robert E. Baldwin, 2007-12-01 The need for careful research on trade policy is particularly acute and this volume empirically addresses these and many other important issues The contributors offer studies which integrate the institutional details of current trade policy with creative economic analyses Marked by a shift from a traditional reliance on simulation models these papers take their inspiration from recent changes in the assumptions traditionally underlying research in international trade theory No longer are government policies viewed as being somehow given to the researcher in part 1 Analyses with a Political Economy Perspective four papers treat such policies as endogenous and explicable in terms of political economy Neither are product and factor markets seen as perfectly competitive instead the three papers in part 2 Trade Policy Effects under Imperfectly Competitive Market Conditions assume that firms consider the actions of other companies when formulating their decisions In part 3 A New Measure of Trade Restrictiveness and Estimates of Trade Policy Effects with CGE Models the first essay explores the quantitative restrictions on cheese to develop and implement a new model of restrictive trade Two final contributions address problems for which simulation modeling is especially useful The first considers the effectiveness of an import surcharge in reducing the U S trade deficit and the second treats the welfare effects of liberalization in South Korea where increasing returns to scale are significant These innovative studies focus on economic behavior that will provide valuable insights for policymakers academic economists and students

Empirical Studies of Commercial Policy Robert E. Baldwin, 1991 *Trade Policy Issues and Empirical Analysis* Robert E. Baldwin, 2008-04-15 Interest in U S trade policy has been stimulated in recent years by the massive American trade deficit by the belief that intervention by foreign governments in international markets has given other countries a competitive edge over the United States and by concern about the increase in protectionism among industrial countries In turn major analytical developments in international economics have revolutionized trade theory broadening its scope both by introducing in a more formal manner such concepts as imperfect competition increasing returns product differentiation and learning effects and by including the study of political and economic factors that shape trade policy decisions This collection of papers the result of a conference held by the NBER applies these new trade theories to existing world cases and also presents complementary empirical studies that are grounded in more traditional trade theories The volume is divided into four parts The papers in part 1 consider the problem of imperfect competition empirically assessing the economic effect of various trade policies introduced in industries in which the new trade theory seems to apply Those in part 2 isolate the effects of protection from the influences of the many economic changes that accompany actual periods of protection and also examine how the effects from exogenous changes in economic conditions vary with the form of protection Part 3 provides new empirical evidence on the effect of foreign production by a country's firms on the home country's exports Finally in part 4 two key bilateral issues are analyzed recent U S Japanese trade tensions and the incident involving the threat of the

examines detailed case studies and provides a comprehensive history of the institutions that govern trade policy making Unlike most scholars who see trade policy as disparate and ad hoc O Halloran is able to explain both early and contemporary American trade policy in a consistent and integrated fashion She argues that a single set of procedures may lead to apparently different outcomes under differing initial conditions therefore the key is to identify the common logic derived from constitutional imperatives that underlies all policy outcomes Economy-wide Modeling of the Economic Implications of a FTA with Mexico and a NAFTA with Canada and Mexico ,1992 The symposium included nearly all of the research by computable general equilibrium CGE modelers currently involved in studying the NAFTA as well as one macroeconomic forecasting model of a FTA with Mexico The first volume is a critical review and summary prepared by the Commission staff Thesecond volume is an addendum of all the papers submitted by the authors and discussants written comments Vol 1 preface
