Employment And Development A New Review Of Evidence:

Employment and Development Gary S. Fields, 2019 This book brings together the contributions of 2014 IZA Prize in Labor Economics award winner Gary Fields to address global employment and poverty problems The central questions in his work are how economic growth affects standards of living how labor markets work in developing countries and how different labor market policies affect well being

Labour Markets, Poverty, and Development Giorgio Barba Navaretti, Riccardo Faini, Giovanni Zanalda, 1999 As we reach the turn of the millennium the disparity between developed and developing world is of increasing concern Labour Poverty and Development brings together a worldwide mix of contributors from both the academic and practitioner sides of the current debate combining rigorous economic analysis and broader based theorizing to provide a detailed picture of the causes effects and implications of the current situation in the developing world All the contributions stress the vertical relationship between macro trends and micro functionings of markets Part I deals with the interaction between employment and growth and trade policy investigating the positive relationship between growth and employment and the connection between trade liberalization and better working conditions Part II looks at the situation in urban areas the crucial and often hidden role that the informal sector plays in the urban employment market and its connection to the formal labour sector and the collective decision making involved in gender differentials in education Finally Part III investigates the other side of the ruralurban divide with a detailed micro study of labour supply in rural communes in China and an analysis of a common developing world poverty trap the spiralling relationship between destitution and low productivity

Revisiting the Informal Sector Sarbajit Chaudhuri, Ujjaini Mukhopadhyay, 2009-10-15 This book provides insight into the diverse aspects of the informal sector its role in the context of unemployment child labor globalization and environment as well as its multi faceted interaction with the other sectors of the economy

Adjustment, Poverty and Employment in Mexico Araceli Damian, 2017-11-01 This title was first published in 2000 Analyzing the poverty trends in Mexico during the 1980s and early 1990s this work is concerned with the extent to which changes in the levels of poverty have modified the extent of participation in the labour market The period covered is 1982 to 1994 when the Mexican economy experienced an economic crisis and the government set in motion the main stabilization policies and structural adjustment reforms The author challenges the idea that adjustment reforms have had social costs in terms of income and formal employment loss Despite income losses well being indicators continued to improve and employment statistics show that employment grew despite the economic crisis and adjustment The paradox of household income decline and the increase in income poverty is explained

Economics of the Labour Market P. N. (Raja) Junankar, 2016-01-12 The global crisis has led to dramatic increases in unemployment rates over most of the countries of the OECD This book provides alternative explanations of this phenomenon Junankar begins with surveys of the labour market labour demand labour supply and labour force participation He argues that the growth of unemployment and long term unemployment is mainly due to a lack of

aggregated demand and not due to high unemployment benefits Economics of the Labour Market shows that unemployment and long term unemployment impose serious and significant costs on individuals families and society in general Raja Junankar focuses on vital social issues arising from the malfunctioning of economies and this collection of essays tackles the real cost of unemployment

Gender, Ethnicity and the Informal Sector in Trinidad Robert B. Potter,Sally Lloyd-Evans,2018-02-06 This title was first published in 2002 Throughout much of the developing world and especially in Africa and Latin America the informal employment sector is growing spectacularly This study focuses on the gender and ethnic aspects of the informal economy in Trinidad

Employment and Inclusive Development Rizwanul Islam,Iyanatul Islam,2015-02-11 Issues relating to employment and labour have once again come to the fore of global policy debates in the wake of the widespread unemployment that has accompanied the current financial crisis In the developing world there is a growing realization that productive employment promotion and social protection have to be at the core of inclusive growth and development This book supports the view that employment is a cross cutting issue shaped by macroeconomic and microeconomic policy interventions and provides a capacious framework to analyse the complexity of this global debate It covers a wide range of issues that have received insufficient attention in the discourse of development and labour economics These include the impact of macroeconomic policies on employment labour rights the development of human capabilities and employability youth employment the benefits and costs of labour market flexibility and the importance of social protection for all This important book aims at filling this gap by revisiting old debates and reconnecting them to the contemporary context combining analyses with relevant empirical evidence It will appeal to a diverse readership of academic institutions and think tanks international organizations bilateral donors working on development issues and policy makers in developing countries

Insights into Inclusive Growth, Employment and Wellbeing in India Arup Mitra,2012-08-12 What changes are occurring at the macro and the

sectoral levels how the labour market changes are taking place and what impact is felt on the low income households are some of the questions that the present volume focuses on. It begins by examining the sectoral composition of growth, revisiting the issues related to industry-services balance and also brings out the spatial dimension of growth. On the one hand, the industry does not seem to have played a major role in the context of employment generation as imported technology is by and large capital intensive in nature. On the other hand, the services-led growth is seen to have reduced the pace of poverty reduction. Given the services-led growth, the possible impact of trade in services on employment both in the formal and informal sectors have been worked out, indicating limited positive spill-over effects. The labour market outcomes are brought out with great details, suggesting that rapid economic growth in India could not result in productive employment generation on a large scale. The gender dimensions of employment are brought out to verify if reduction in labour market inequality can result in improving the position of women in other spheres encompassing the decision-making process both within the household and outside the household. Issues relating to urbanisation and rural-urban migration are also covered to understand the dynamics of urban poverty and to bring out the challenges of population transfer given the spatial concentration of growth. The job search practices pursued by the low income households are often pursued in terms of informal networks. What problems are associated with such mechanisms in experiencing improvements in well-being levels are covered in the present volume. On the whole, the volume offers an explanation of limited poverty reduction in a situation of rapid economic growth on the basis of an inter-disciplinary framework, though efforts are being made to keep the methodology quantitatively rigorous.

Accelerators of India's Growth—Industry, Trade and Employment Suresh Chand Aggarwal, Deb Kusum Das, Rashmi Banga, 2020-02-14. This book offers a collection of distinguished contributions that identify current growth accelerators in India and suggest policies and strategies to make India's growth more sustainable and inclusive. The papers are divided into three sections, the first of which focuses on issues related to industrial growth in India. The discussions include India's industrial development, manufacturing, construction and mining, role of manufacturing, global value chains and of environment in industrial development. In turn, section II deals with issues related to trade and FDI as accelerators of India's growth. The respective chapters explore the changing patterns of trade impacts of technology and spill-over effects of FDI to name a few. Lastly, the third section discusses employment-related issues like measurement of labour input, the dichotomy of the Indian labour market, the nature of firms and employment generation and impacts of technology on employment. Given its scope and focus, the book offers an invaluable resource for researchers and policymakers alike.
