Decisions for Sustainability Thomas Dietz, 2023-06-08. Decisions by individuals organisations and nations shape the well being of humans and other species the environment and sustainability. Decisions for Sustainability examines how we can make better decisions concerning our future. It incorporates sociological psychological and economic perspectives to highlight our strengths and weaknesses in decision making and suggest strategies to influence both individual and societal decisions. Sustainability challenges from local land use and toxic contamination to climate change and biodiversity loss illustrate how we can improve decision making and what factors lead to conflict. How we use science in the

face of uncertainty is also examined and a range of ethical criteria for good decisions are proposed Emphasizing the need for diversity in decision making and clarifying the relationship between reform and societal transformation this book provides a comprehensive view of what we know about decision making and how we can do better in the face of sustainability challenges
