The emu is Australia's largest bird and the world's second largest. It comes second to the ostrich.

Emus are very unique in the way they look. They have long necks and very sharp beaks.

Their ears are quite small and they have two sets of eyelids. One eyelid is used to keep the dust out while the other is used for blinking. Altogether they have six toes, three on each foot. On each foot there is a talon which is used for fighting and protecting themselves against predators. Emus have very soft light brown feathers. They are also known to grow between 1.5-2 metres in height and can weigh up to 60kg. They are flightless birds.

Emus like to eat a lot of food, especially if there is a lot around them. When they eat lots, the food is stored in fat. They can then survive for longer periods as they go in search for more food. Emus live in flocks or pairs.

**Economic Governance in Europe** Federico Fabbrini,2016-01-28 The Euro Crisis and the legal and institutional responses to it have had important constitutional implications on the architecture of the European Union EU Going beyond the existing literature Federico Fabbrini s book takes a broad look and examines how the crisis and its aftermath have changed relations of power in the EU disaggregating three different dimensions 1 the vertical relations of power between the member states and the EU institutions 2 the relations of power between the political branches and the courts and 3 the horizontal relations of power between the EU member states themselves The first part of the book argues that in the aftermath of the Euro crisis power has been shifting along each of these axes in paradoxical ways In particular through a comparison of the United States Fabbrini reveals that the EU is nowadays characterized by a high degree of centralization in budgetary affairs an unprecedented level of judicialization of economic questions and a growing imbalance between the member states in the governance of fiscal matters As the book makes clear however each of these dynamics is a cause for concern as it calls into question important constitutional values for the EU such as the autonomy of the member states in taking decision about taxing and spending the preeminence of the political process in settling economic matters and the balance between state power and state equality The second part of the book therefore devises possible options for future legal and institutional developments in the EU which may revert these paradoxical trends In particular Fabbrini considers the ideas of raising a fiscal capacity restoring the centrality of the EU legislative process and reforming the EU executive power and discusses the challenges that accompany any further step towards a deeper Economic and Monetary Union

**Convergence to Crisis** Alison Johnston,2016-05-19 What explains Eurozone member states divergent exposure to Europe s sovereign debt crisis Deviating from current fiscal and financial views From Convergence to Crisis focuses on labor markets in a narrative that distinguishes the winners from the losers in the euro crisis Alison Johnston argues that Europe s monetary union was structured in a way that advantaged the corporatist labor markets of its northern economies in external trade and financial lending Northern Europe s distinct economic advantage lay not with its fiscal capabilities which were not that different from those of southern Eurozone countries but with its wage setting institutions Through highly coordinated collective bargaining the euro North persistently undercut the inflation performance of southern trading partners destining them to a perpetual cycle of competitive decline and external borrowing While northern Europe s corporatist labor markets were always low inflation performers monetary union ultimately made their wage setting institutions toxic for the South The euro s institutional predecessor the European Monetary System included economic and institutional mechanisms that facilitated macroeconomic adjustment and convergence between the common currency s corporatist and noncorporatist economies Combining cross national statistical analysis with detailed qualitative case studies of Denmark Germany Italy Ireland the Netherlands and Spain Johnston reveals that monetary union s removal of these mechanisms allowed external imbalances between these two blocs to grow unchecked underpinning the crisis in which Europe currently finds itself Rather than achieving the EU s goal of an ever closer union the common currency produced a monetary environment that destabilized the economic integration of its diverse labor markets **European Monetary Integration 1970-79 D.**

seems to be important is the ability to combine heterogeneous representation and problem solving techniques Research on heterogeneous intelligent systems goes hand in hand with research on specific problem solving methods and paradigms therefore representing their conceptual and practical glueing element The papers contained in this proceedings are just one instance of such awareness activity in the international scientific community *Europe, Canada and the Comprehensive Economic and Trade Agreement* Kurt Hübner,2011-04-01 The Great Recession and the turn towards all forms of protectionism stress the relevance of international trade policy With the global economy undergoing deep structural changes the negotiations between Canada and the EU on a Comprehensive Economic and Trade Agreement CETA present a real time experiment that sheds light on the direction that the relationships between two economic units of the G8 will take For Canada an agreement with the EU would end its current dependency on the US for the EU an agreement with Canada would be a first with a G8 economy and indicate how its new trade strategy Global Europe will look like This book is the first to simultaneously analyze the undercurrents of this project and introduce the main topics at hand CETA is much more than a simple free trade agreement its breadth covers regulatory aspects in goods services and finance the opening of public procurement markets attitudes and policies of Canadian provinces towards liberalization climate policies and international leadership claims of the EU in comparison to Canadian policy attempts the challenges of the Euro project and the reform efforts and the challenges of the Euro as a international reserve currency CETA is a challenging project that will kick start enormous changes in trade policy making as well as in market openness in Canada It will mark the EU s efforts to re make the Atlantic Economy This book provides deep insights into the ambiguity of the project and addresses the implications of a rapidly changing global economy for trade policy Offering analysis of the financial industry banking trade policy climate change strategy and the Euro exchange rate this book should be of interest to students and policy makers alike *European Union Politics* Michelle Cini,2007 With its established authority and reputation the new edition is an invaluable resource Michelle Cini has brought together a team of international contributors each specialising in a different field of EU politics The book is divided into five parts and deals with the history of the European integration process theories of European integration the European institutions a selectnumber of European policy areas and issues of relevance to the study of EU politics The second edition has been updated throughout to reflect recent developments and there are four new chapters on the constitutional treaty CFSP and ESDP the single market and public opinion This books is supported by a cutting edge Online Resource Centre Student resources Interactive timeline BRAND NEW HE ONLINE RESOURCE Interactive map of Europe with facts key dates and web links for all the EU countries BRAND NEW HE ONLINE RESOURCE Maps Case studiesWeb links Information on key articles and books Flashcard glossary Multiple Choice Questions Lecturer resources PowerPoint slides [The Politics of the Eurogroup](#) Joscha Abels,2023-06-30 The Politics of the Eurogroup provides an intriguing look inside the euro crisis and the secretive forum of finance ministers that came to dominate it The history of the

European Union is a history of crises and the leaps of integration they triggered. As the pandemic, the war in Ukraine and global power competition are clouding the prospects of the European economies, the member states are looking for solutions. Yet they find their options highly constrained by the economic and political realities created in the decade of the euro crisis. This book fuses a critical political economy perspective on structural relations within the Economic and Monetary Union with a power based approach to its institutions. It explains why a political project of European austerity emerged from the Eurogroup and side lined alternative policies with repercussions still felt today. The author introduces a series of interviews with key decision makers, ministers, central bankers and EU officials as well as leaked audio recordings from Eurogroup meetings to give an authentic report of the power struggles between finance ministers. The book retraces how the Eurogroup rose to prominence in the crisis and how a few northern countries led by the German and Dutch finance ministries were able to exploit the group's informal processes to shape the Economic and Monetary Union to their advantage. With its interdisciplinary and investigative approach, this book will be of great interest for scholars and students concerned with European integration, international political economy, economics, institutionalism and governance. It will also be of value for policy makers in the fields of European politics and economic governance.

**Global Liberalism and Political Order** Steven Bernstein, Louis W. Pauly, 2012-02-01. Many years ago John Gerard Ruggie coined the phrase 'embedded liberalism' to describe the grand post 1945 political compromise between free market liberalism and domestic political interventionism that stabilized the multilateral economic order. In *Global Liberalism and Political Order*, leading scholars of political economy and international relations assess the challenges facing today's increasingly interdependent world as globalization redefines the old political order. They address the unraveling and/or reinvention of a grand compromise in global governance from a variety of theoretical perspectives and issue areas including trade, finance, networked governance, North-South relations and the environment. Focusing on the foundations of

political authority at the global level the contributors imagine the implications of success or failure for international economic order and political stability Ruggie whose work inspired many of this book's scholars contributes a chapter on the prospects for a new global as opposed to international grand bargain      *Growth and International Trade* Karl Farmer, Matthias Schelnast, 2021-04-01 Revised and updated for the 2nd edition this textbook guides the reader towards various aspects of growth and international trade in a Diamond type overlapping generations framework Using the same model type throughout the book timely topics such as growth with bubbles robots and involuntary unemployment financial integration and house price dynamics policies to mitigate climate change and the persistence of religion in a globalized market economy are explored The first part starts from the old growth theory and bridges to the new growth theory including R D and human capital approaches The second part presents an intertemporal equilibrium theory of inter and intra sectoral trade investigates innovation growth and trade and limits to public debt as well as nationally and internationally optimal climate policies The debt dynamics of the Euro Zone and the origins of intra EMU and Asian US trade imbalances are also explored The book is primarily addressed to upper undergraduate and graduate students wishing to proceed to the analytically more demanding journal literature
