Mending the World Rosemarie Robotham, 2009-07-21 The many facets of black family life have not always been fully visible in American literature Black families have often been portrayed as chaotic fractured and emotionally devastated and historians and sociologists are just beginning to acknowledge the resilience and strength of African American families through centuries of hardship In *Mending the World* a host of beloved writers celebrate the richness of black family life revealing how deep complicated and joyous modern kinship can be From James McBride's tender recollection of the man who claimed eight stepchildren as his own to Toi Derricotte's moving portrait of a pregnant teenager who decides to keep her child from Debra Dickerson's lament over the shooting that crippled her nephew to Charles Johnson's whimsical look at a married couple's mid life crisis from Shay Youngblood's moving fictional evocation of a lost mother to poet Kendel Hippolyte's poignant telling of a father's unexpected legacy this inspiring volume presents through fiction memoir and poetry a multi layered and optimistic portrait of today's black America *Mending the World* features fiction personal memoir and poetry by new writers some publishing here for the first time and established members of the canon *Black Like Us* Devon W.

Black Children's Literature Got de Blues Nancy Tolson, 2008 Here is an innovative exploration of the blues aesthetic that reflects the literary work created by Black authors and illustrators for the Black child reader This book examines literature written for Black children using critical and creative writings by artists scholars and critics that define the blues within Black adult literature poetry and the visual arts The book identifies Black children's literature published in the past forty years by authors and illustrators who can be classified as blues artists and whose work reflects social political economical and historical developments of the Black experience throughout the United States Referencing work created by Jacqueline Woodson Walter Dean Myers John Steptoe Tom Feelings Sherley Anne Williams and others this book

demonstrates how the blues aesthetic now includes the literature dedicated to Black children **The Lever of Riches** Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe

bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution. What were the causes of technological creativity? Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas. He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution. He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition. He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs. Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity. *The Lever of Riches* with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential.
