sound and music ubiquitous elements of ritual and religion often glossed over in other disciplines *Resounding Transcendence* confronts the relationship of sound divinity and religious practice in diverse post secular contexts By examining the immanence of transcendence in specific social and historical contexts and rethinking the reified nature of religion and world religions these authors examine the dynamics of difference and transition within and between sacred musical practices The work in this volume transitions between traditional spaces of sacred musical practice and emerging public spaces for popular religious performance between the transformative experience of ritual and the sacred musical affordances of media technologies between the charisma of individual performers and the power of the marketplace and between the making of authenticity and hybridity in religious repertoires and practices Broad in scope rich in ethnographic and historical detail and theoretically ambitious *Resounding Transcendence* is an essential contribution to the study of music and religion Ritual Soundings Sarah Weiss,2019-03-16 The women of communities in Hindu India and Christian Orthodox Finland alike offer lamentations and mockery during wedding rituals Catholic women of southern Italy perform tarantella on pilgrimages while Muslim Berber girls recite poetry at Moroccan weddings Around the world women actively claim agency through performance during such ritual events These moments though brief allow them a rare freedom to move beyond culturally determined boundaries In *Ritual Soundings* Sarah Weiss reads deeply into and across the ethnographic details of multiple studies while offering a robust framework for studying music and world religion Her meta ethnography reveals surprising patterns of similarity between unrelated cultures Deftly blending ethnomusicology the study of gender in religion and sacred music studies she invites ethnomusicologists back into comparative work offering them encouragement to think across disciplinary boundaries As Weiss delves into a number of less studied rituals she offers a forceful narrative of how women assert agency within institutional religious structures while remaining faithful to the local cultural practices the rituals represent **The Routledge Handbook of Research Methods in the Study of Religion** Steven Engler,Michael Stausberg,2013-06-17 This is the first comprehensive survey in English of research methods in the field of religious studies It is designed to enable non specialists and students at upper undergraduate and graduate levels to understand the variety of research methods used in the field The aim is to create awareness of the relevant methods currently available and to stimulate an active interest in exploring unfamiliar methods encouraging their use in research and enabling students and scholars to evaluate academic work with reference to methodological issues A distinguished team of contributors cover a broad spectrum of topics from research ethics hermeneutics and interviewing to Internet research and video analysis Each chapter covers practical issues and challenges the theoretical basis of the respective method and the way it has been used in religious studies illustrated by case studies *The Oxford Handbook of Music and World Christianities* Suzel Ana Reily,Jonathan M. Dueck,2016-03-16 The Oxford Handbook of Music and World Christianities investigates music's role in everyday practice and social history across the diversity of Christian religions and practices around the globe The volume

explores Christian communities in the Americas Europe Africa Asia and Australia as sites of transmission transformation and creation of deeply diverse musical traditions The book s contributors while mostly rooted in ethnomusicology examine Christianities and their musics in methodologically diverse ways engaging with musical sound and structure musical and social history and ethnography of music and musical performance These broad materials explore five themes music and missions music and religious utopias and other oppositional religious communities music and conflict music and transnational flows and music and everyday life The volume as a whole then approaches Christian groups and their musics as diverse and powerful windows into the way in which music religious ideas capital and power circulate and change between places now and historically It also tries to take account of the religious self understandings of these groups presenting Christian musical practice and exchange as encompassing and negotiating deeply felt and deeply rooted moral and cultural values Given that the centerpiece of the volume is Christian religious musical practice the volume reveals the active role music plays in maintaining and changing religious moral and cultural values in a long history of intercultural and transnational encounters
