SAPIENS & CONSCIOUSNESS Augustin Ostace, 2018-09-04 The Species Sapiens is a strange genesis of the father cosmos and Mother Nature re combining into a unique singularity qualities of biological characteristics as walking upright free of hands or increase of brain with ontological characteristics as articulated language writing through alphabet and abstract thinking The Man itself throughout its convoluted history has created its own legislation becoming a law giver in organization of the society by imposing thus a set of laws in following the rules into the human society in creating a morality of the duty towards its own symbols as nation as constitution as anthem as flags as language as history and ethnology by preserving its old tradition into the state into the country or into the nation The logical laws of the continuum specierum presupposes a transcendental law *lex continui in natura* which is beyond of the experience and deduction but it is an heuristic principle in guiding of the employment of reason having in its peak representation the consciousness itself by defining the man as unique carrier of the self consciousness and the Species Sapiens as the Species of the universal Self Consciousness Sapientologis

NEURON & CORTEXOLOGIST Augustin Ostace, 2018-09-03 It is usually said that the Culture is the nature of man *Kultur ist Natur des Menschen* but we must accept *volens nolens* that the Book is the essence of human culture *Das Buch ist die wessentlich der Kultur des Menschen* Upon this assumption we must accept that the neuron is the basic anatomical

structure of the entire nervous system of all innervated living systems of the biology culminating in human through its neo cortex system as the highly abstract development of an abstract representation existing in singularity at least up to date within the knowing Universe Our endeavour is trying in a reconnection between neuron of biology with the neo cortex of human ontology in a synthesis that is done upon a triad of philosophical schools like those of rationalist philosophy of empiricist philosophy and of idealist philosophy Nonetheless for this extremely complex philosophy endeavour will be used ideas and concepts belonging to the materialist and idealist of Greek philosophy to those of Oriental philosophy of Hinduism Buddhism and Jainism of India and Taoism Confucianism and Chanism of China Moreover will be some references to the ideas and concepts from different religions of human being namely those of Egyptian religions Mesopotamian religions then those of Judaism Christianity and Islam religions then to those belonging to the Persian religion of Zoroastrianism of Manicheism and of Shintoism

Cortexology Future of Intelligent and Extelligent Health Environment Renata Glowacka Bushko, 2005 Human body and the world in which it functions is a changing complex adaptive system We are able to collect data about it but the challenge is to infer local dynamics from that data Intelligent Caring Biomechatronic Creatures and Healthmatics have a better chance of inferring the dynamics that needs to be understood than human physicians
