Pro Basketball's All-Time All-Stars Robert W. Cohen, 2013-03-14 The history of the NBA has been filled with superstars names known to fans and non-fans alike But while comparisons between athletes who competed against each other face-to-face is a common occurrence in the sports world it is not quite as easy to compare players from different eras How would Wilt Chamberlain stack up against Shaquille O'Neal What about LeBron James and Larry Bird or Magic Johnson and Oscar Robertson In *Pro Basketball's All-Time All-Stars Across the Eras* Robert Cohen not only examines the best players from each era but also ranks the five greatest players at each position in the history of the pro game Dividing the history of professional basketball into five distinct eras this book first describes the style of play that prevailed during each period From the slow-paced rough and tumble style of play that characterized the NBA during its formative years to the up-tempo high-flying style that currently prevails *Pro Basketball's All-Time All-Stars* gives an in-depth view of how the game has evolved For each of the five eras Cohen has selected the best players to man the five positions on the court providing career bios for each To determine the best of the best Cohen considers the level of dominance each player reached during his time in the league his individual statistics the degree to which he impacted the fortunes of his team and the extent to which he improved his teammates level of play Individual honors and quotes from teammates and opponents alike are used to support the rankings Covering NBA greats such as Bob Pettit Bill Russell Kareem Abdul-Jabbar Michael Jordan and Kobe Bryant this book will appeal to basketball fans of all generations and to any NBA fan interested in the history of the game

21st Century Anthropology: A Reference Handbook H. James Birx, 2010-06-10 Highlighting the most important topics issues questions and debates these two volumes offer full coverage of major subthemes and subfields within the discipline of

anthropology **City of Knowledge in Twentieth Century Iran** Setrag Manoukian,2012-03-12 This book presents a cultural history of modern Iran from the point of view of Shiraz a city famous for its poetry and its traditions of scholarship Exploring the relationship among history poetry and politics the book analyses how Shiraz came to be defined as the country s cultural capital and explains how Iranians have used the concept of culture as a way of thinking about themselves their past and their relationship with the rest of the world Weaving together a theoretical approach with extensive ethnographic research the book suggests a model to integrate broad concerns with a nuanced analysis of Iran s cultural traditions and practices The author s interdisciplinary approach sheds light on how contemporary Iranians relate to classical Persian poetry on the relationship between expressive forms and the political imagination and on the different ways teachers professors cultural managers poets and scholars think and work He describes how history and poetry are the two dominant modes to talk about the past present and future of the town and demonstrates that the question of knowledge is crucial to an understanding of the political and existential dimensions of life in Iran today This book will be a major contribution to the current effort to move away from nationalist views of Iranian history and culture and as such will be of great interest to scholars of cultural anthropology history Middle Eastern studies and Iranian studies **The Publishing and Review of Reference Sources** Bill Katz,Robin Kinder,2019-12-06 This book first published in 1987 provides important information on reference publishing including valuable guidelines on evaluating publications and sources The articles contained here are all written by leading experts in the field *Humanities* ,2011 **A Rhetoric of Literate Action** Charles Bazerman,2013-09-12 Undertaken by one of the most learned and visionary scholars in the field this work has a comprehensive and culminating quality to it tracking major lines of insight into writing as a human practice and articulating the author s intellectual progress as a theorist and researcher across a career **Federal Trade Commission Decisions** United States. Federal Trade Commission,1972 **Postmodernism and the Enlightenment** Daniel Gordon,2014-01-14 Why is postmodernist discourse so biased against the Enlightenment Indeed postmodern theory challenges the validity of the rational basis of modern historical scholarship and the Enlightenment itself Rather than avoiding this conflict the contributors to this vibrant collection return to the philosophical roots of the Enlightenment and do not hesitate to look at them through a postmodernist lens engaging issues like anti Semitism Utopianism colonial legal codes and ideas of authorship Dismissing the notion that the two camps are ideologically opposed and thus incompatible these essays demonstrate an exciting new scholarship that confidently mixes the empiricism of Enlightenment thought with a strong postmodernist skepticism painting a subtler and richer historical canvas **The Problem of a Chinese Aesthetic** Haun Saussy,1995-01-01 The Problem of a Chinese Aesthetic calls for and applies a new model of comparative literature one that instead of taking for granted the commensurability of traditions and texts gives incompatibility and contradiction their due Exposing contemporary literary theory to the risks of ancient Chinese literature and vice versa this book considers a linked

series of case studies To what degree does the translation between languages and texts that we call comparative literature depend on allegory or translation within a single text or language The author offers an important new perspective on the reading of the Shih ching or Book of Odes and the question of allegory and metaphor in the Chinese poetic tradition

Physics of the Human Temporality Ihor Lubashevsky, Natalie Plavinska, 2021-10-21 This book presents a novel account of the human temporal dimension called the human temporality and develops a special mathematical formalism for describing such an object as the human mind One of the characteristic features of the human mind is its temporal extent For objects of physical reality only the present exists which may be conceived as a point like moment in time In the human temporality the past retained in the memory the imaginary future and the present coexist and are closely intertwined and impact one another This book focuses on one of the fragments of the human temporality called the complex present A detailed analysis of the classical and modern concepts has enabled the authors to put forward the idea of the multi component structure of the present For the concept of the complex present the authors proposed a novel account that involves a qualitative description and a special mathematical formalism This formalism takes into account human goal oriented behavior and uncertainty in human perception The present book can be interesting for theoreticians physicists dealing with modeling systems where the human factor plays a crucial role philosophers who are interested in applying philosophical concepts to constructing mathematical models and psychologists whose research is related to modeling mental processes

Missionary Review of the World, 1909

The Encyclopedia of Country Music Michael McCall, John Rumble, Paul Kingsbury, 2012-02-01 The Encyclopedia of Country Music is the most comprehensive reference work on this musical genre with deep roots in American history Compiled by staff of the legendary Country Music Hall of Fame and Museum the Encyclopedia includes 1 200 A Z entries on all aspects of country music as well as hundreds of images informative and entertaining essays on such topics as the colorful costumes of country and much more The new edition has been thoroughly updated to cover the first decade of the twenty first century and the evolution of the genre

Encyclopedia of American Gospel Music W. K. McNeil, 2005 First Published in 2005 Routledge is an imprint of Taylor Francis an informa company

The Art and Science of Making the New Man in Early 20th-Century Russia Yvonne Howell, Nikolai Kremmentsov, 2021-12-02 The idea that morally mentally and physically superior new men might replace the currently existing mankind has periodically seized the imagination of intellectuals leaders and reformers throughout history This volume offers a multidisciplinary investigation into how the new man was made in Russia and the early Soviet Union in the first third of the 20th century The traditional narrative of the Soviet new man as a creature forged by propaganda is challenged by the strikingly new and varied case studies presented here The book focuses on the interplay between the rapidly developing experimental life sciences such as biology medicine and psychology and countless cultural products ranging from film and fiction dolls and museum exhibits to pedagogical projects sculptures and exemplary agricultural fairs

With contributions from scholars based in the United States Canada the UK Germany and Russia the picture that emerges is emphatically more complex contradictory and suggestive of strong parallels with other new man visions in Europe and elsewhere In contrast to previous interpretations that focused largely on the apparent disconnect between utopian new man rhetoric and the harsh realities of everyday life in the Soviet Union this volume brings to light the surprising historical trajectories of new man visions their often obscure origins acclaimed and forgotten champions unexpected and complicated results and mutual interrelations In short the volume is a timely examination of a recurring theme in modern history when dramatic advancements in science and technology conjoin with anxieties about the future to fuel dreams of a new and improved mankind
