**Millennium Encyclopedia Yearbook 2001** Dorling Kindersley Publishing, Incorporated, 2000-09-01      **The Twenty-First Century: The World Without Russia** Олег Арин/Алекс Бэттлер, In this book Alex Battler questions the assertion of Russia's status as a great power in the acute form. The author reveals the contradictions between Russia's real modern potential and its foreign policy objectives formulated by official Moscow. The author has formulated laws on the Pole of Power and Force. Battler introduces some new concepts of the Theory of International Relations: The Foreign Policy Potential of the State and The Law on the Optimal Balance Between the Costs of Domestic and Foreign Policy. On almost all problems raised by the author, his views do not coincide with generally accepted interpretations and approaches. The second extended edition of the book **The Twenty-First Century: The World Without Russia** includes updated copyright and newly added parts and paragraphs.

Early Latino Ballplayers in the United States Nick C. Wilson, 2013-02-07 From 1900 through the 1940s, Latino baseball players suffered discrimination, poor accommodations, low pay, and homesickness to play a game they loved. Those who were both talented and light-skinned enough to make it to the majors were mocked for being foreign. Those in the Negro Leagues were like African American ballplayers: segregated and largely ignored by the public and major league scouts. Building on the work of researchers who focused on the seasons and careers of these pioneer athletes, Nick Wilson draws on primary documents and interviews to round out our knowledge of the players as people. Jose Mendez, Miguel Gonzalez, Luis Tiant Sr., Martin Dihigo, Rodolfo Fernandez, Roberto Ortiz, Cristobal Torriente, Hiram Bithorn, and Pedro Preston Gomez are only a few examples of the players included here. Appendices on Americans Who Positively Influenced Latin Migration and Latinos and the Washington Senators Spring Training Camps 1939-1942 are included along with 26 photos, appendices, notes, bibliography, and index.

Chen,Jason L. Powell,2012-02-02 China which is fast on its way to becoming the most powerful economic force in the world  
has four unique characteristics that distinguish it from other countries in Asia 1 The proportion of aging population is  
growing faster than that of Japan the country previously recognized as having the fastest rate and much faster than nations  
in western Europe 2 An early arrival of an aging population before modernization has fully taken place with social policy  
implications It is certain that China will face a severely aged population before it has sufficient time and resources to  
establish an adequate social security and service system for older people 3 There will be fluctuations in the total dependency  
ratio The Chinese government estimates are that the country will reach a higher dependent burden earlier in the twenty first  
century than was previously forecast 4 The government s fertility policy single child per family and its implementation has a  
strong influence on the aging process Fewer children are being born but with more elderly people a conflict arises between  
the objectives to limit population increase and yet maintain a balanced age structure Peng and Guo 2001 The intersection of  
these fourfold factors means that the increased aging population is giving rise to serious concerns among Chinese social  
policy makers There is a chronic lack of good resource materials that attempt to make sense of social policy in its  
relationship to examining the problems and possibilities of human aging grounded in an analysis of economic of social policy  
in China and impact on rural and urban spaces Such analysis of China will be covered by conceptual theoretical and  
empirical approaches The book will also discuss substantive topics of housing community care family care pensions and  
mental health The book brings together a truly world class array of researchers to provide discussions of critical implications  
of aging social policy and the economic impact in China     Kierkegaard Bibliography Peter Šajda,Jon Bartley Stewart,2016  
**Intertemporal Linguistics in International Law** Julian Wyatt,2019-12-12 Intertemporal Linguistics in International

Law examines and offers an overdue solution to a specific problem central to the resolution of an ever increasing number of international legal disputes how to interpret a treaty with terms that change in meaning over time A wide ranging review of the relevant international case law and scholarship reveals that no rule principle or authority of international law including even the oft cited evolutionary interpretation doctrine provides international adjudicators with the firm and practical guidance on this specific question that contemporary international litigants demand Using an analytical approach inspired by the comparative method and drawing on specific concepts from external fields including private law legal theory and principally modern day linguistics Intertemporal Linguistics in International Law restructures the most relevant international case law around a new conceptual framework that offers fresh insight into the process of treaty interpretation It demonstrates that by distinguishing between resolving ambiguity and resolving vagueness and by identifying the temporal sense intention with which a treaty term is used international adjudicators can avail themselves of a more predictable and appropriate method for solving this complex and practically important problem of international law
