The Dirty Energy Dilemma Benjamin K. Sovacool, 2008-10-30 The American electric utility system is quietly falling apart Once taken for granted the industry has become increasingly unstable fragmented unreliable insecure inefficient expensive and harmful to our environment and public health According to Sovacool the fix for this ugly array of problems lies not in nuclear power or clean coal but in renewable energy systems that produce few harmful byproducts relieve congestion on the transmission grid require less maintenance are not subject to price volatility and enhance the security of the national energy system from natural catastrophe terrorist attack and dependence on supply from hostile and unstable regions of the world Here arises The Dirty Energy Dilemma If renewable energy systems deliver such impressive benefits why are they languishing at the margins of the American energy portfolio And why does the United States lag so far behind Europe where conversion to renewable energy systems has already taken off in a big way Corporate media parrot industry PR that renewable technologies just aren't ready for prime time But Sovacool marshals extensive field research to show that the only barrier blocking the conversion of a significant proportion of the U S energy portfolio to renewables is not technological the technology is there but institutional Public utility commissioners utility managers system operators business owners and ordinary consumers are hobbled by organizational conservatism technical incompatibility legal inertia weak and inconsistent political incentives ill founded prejudices and apathy The author argues that significant conversion to technologically proven clean energy systems can happen only if we adopt and implement a whole new set of policies that will target and dismantle the insidious social barriers that are presently blocking decisions that would so obviously benefit society

National Self-determination and Secession Margaret Moore

(Ph. D.),1998 In recent years numerous multi national states have disintegrated along national lines and today many more in both the first and the third worlds continue to witness bitter secessionist struggles The proliferation of national conflicts and secessionist movements has given rise to many important questions which urgently need to be addressed When is secession justified What is a people and what gives them a right to secede Is national determination consistent with liberal and democratic principles Or is it a dangerous doctrine In the years following 1991 when Allen Buchanan published *Secession* a number of competing theories of the ethics of secession have been put forward This pathbreaking study by a host of leading figures in the field brings together for the first time a series of original essays on these theories Offering fresh insight into debates about contested territory the problem of minorities and the place of secession in resolving national conflicts this volume provides a much needed philosophical discussion of the normative implications of nationalism Climate Change and Global Energy Security Marilyn A. Brown,Benjamin K. Sovacool,2011-08-12 An exploration of commercially available technologies that can enhance energy security and address climate change and public policy options crucial to their adoption Tackling climate change and improving energy security are two of the twenty first century s greatest challenges In this book Marilyn Brown and Benjamin Sovacool offer detailed assessments of the most advanced commercially available technologies for strengthening global energy security mitigating the effects of climate change and enhancing resilience through adaptation and geo engineering They also evaluate the barriers to the deployment of these technologies and critically review public policy options crucial to their adoption Arguing that society has all the technologies necessary for the task Brown and Sovacool discuss an array of options available today including high efficiency transportation renewable energy carbon sequestration and demand side management They offer eight case studies from around the world that document successful approaches to reducing emissions of greenhouse gases and improving energy security These include the Danish approach to energy policy and wind power Brazil s ethanol program China s improved cookstove program and the U S Toxics Release Inventory Brown and Sovacool argue that meeting the twin challenges of climate change and energy security will allow us to provide energy maintain economic growth and preserve the natural environment without forcing tradeoffs among them

regulation that carve out exceptions to these general principles for specific reasons of policy This treatment of these rules has resulted in an incomplete understanding of the nature of contract law and the principles that underpin it By drawing specifically on contract statutes the volume produces a more complete picture of modern contract law A companion to the ground breaking Tort Law and the Legislature Common Law Statute and the Dynamics of Legal Change Hart Publishing 2012 this collection will have a significant impact on the study of contract law *Integrated Experiential Coaching* Lloyd

Chapman,2018-03-08 Coaching is growing across the globe as a viable and useful intervention to help executives deal with the complexity they face day to day In response to this increased demand many coaches have presented their model of coaching to the world of business and a number of these have made it into print Few are based on a rigorous development process or have provided the reader with an insight into their development The Author wanted to offer to the readers of our professional coaching series the opportunity to engage with a practitioner who had been through a journey of learning built on their experience the literature and research This book meets the need identified for a clear and rigorous account by an experienced coach of the development of their model within the scientist practitioner framework **Hoffbrand's**

Brain Stanislav Grof,1985-01-01 Beyond the Brain seriously challenges the existing neurophysiological models of the brain After three decades of extensive research on those non ordinary states of consciousness induced by psychedelic drugs and by

other means Grof concludes that our present scientific world view is as inadequate as many of its historical predecessors In this pioneering work he proposes a new model of the human psyche that takes account of his findings Grof includes in his model the recollective level or the reliving of emotionally relevant memories a level at which the Freudian framework can be useful Beyond that is perinatal level in which the human unconscious may be activated to a reliving of biological birth and confrontation with death How birth experience influences an individual s later development is a central focus of the book The most serious challenge to contemporary psycho analytic theory comes from a delineation of the transpersonal level or the expansion of consciousness beyond the boundaries of time and space Grof makes a bold argument that understanding of the perinatal and transpersonal levels changes much of how we view both mental illness and mental health His reinterpretation of some of the most agonizing aspects of human behavior proves thought provoking for both laypersons and professional therapists

Confucian Ethics of the Axial Age Heiner Roetz,1993-01-01 Confucian Ethics of the Axial Age describes the formative period of Chinese culture the last centuries of the Zhou dynasty as an early epoch of enlightenment It comprehensively reconstructs the ethical discourse as thought gradually became emancipated from tradition and institutions Rather than presenting a chronology of different thinkers and works this book discusses the systematic aspects of moral philosophies Based on original texts Roetz focuses on filial piety the conflict between the family and the state the legitimating of the political order the virtues of loyalty friendship and harmony concepts of justice the principle of humaneness and its different readings the Golden Rule the moral person the autonomous self motivation decision and conscience and various attempts to ground morality in religion human nature or reason These topics are arranged in such a way that the genetic structure and the logical development of the moral reasoning becomes apparent From this detached perspective conventional morality is either rejected or critically reestablished under the restraint of new abstract and universal norms This makes the Chinese developments part of the ancient worldwide movement of enlightenment of the axial age

The Way of the Empath Elaine Clayton,2022 An empath s life is not ordinary having the skills and the strength of a lion is important because it takes real courage to be empathic There are ways empaths can protect themselves while living with an open heart and this book offers fundamental creative visualization for that purpose Empaths are those who are highly aware of the emotional energy around them and their own emotional needs This sensitivity can be challenging for an empath In fact to be an empath is an art form to discover how our perceptions guide and inform us shape us and at times limit us requires extraordinary awareness The Way of the Empath explores ways to understand empathy and how to use specific tools such as imaginative insight to better understand our place in the Universe With a guiding hand this book covers how to develop these skills Embrace positive receptivity Exercise protection and self care Recalibrate your perceptions of other people s emotions Access intuitive knowing through creative drawing and journaling Book jacket
