Encountering The World Toward An Ecological Psychology:

Encountering the World Edward S. Reed, 1996-08-29 Encountering the World reorients modern psychology by finding a viable middle ground between the study of nerve cells and cultural analysis The emerging field of ecological psychology focuses on the human niche and our uniquely evolved modes of action and interaction Rejecting both mechanistic cognitive science and reductionistic neuroscience the author offers a new psychology that combines ecological and experimental methods to help us better understand the ways in which people and animals make their way through the world The book provides a comprehensive treatment of ecological psychology and a unique synthesis of the work of Darwin neural Darwinism and modern ecologists with James Gibson's approach to perception The author presents detailed discussions on communication sociality cognition and language topics often overlooked by ecological psychologists Other issues covered include ecological approaches to animal behavior neural mechanisms perception action and interaction Provocative and controversial Encountering the World makes a significant contribution to the debate over the nature of psychology

Functionalism Revisited Jon Lang, Walter Moleski, 2016-12-05 A range of current approaches to architecture are neglected in our contemporary writings on design philosophies This book argues that the model of function and the concept of a functional building that we have inherited from the twentieth century Modernists is limited in scope and detracts from a full understanding of the purposes served by the built environment It simply does not cover the range of functions that buildings can afford nor is it tied in a conceptually clear manner to our contemporary concepts of architectural theory Based on Abraham Maslow s theory of human motivations and following on from Lang s widely used text Creating Architectural Theory The Role of the Behavioral Sciences in Environmental Design Lang and Moleski here propose a new model of functionalism that responds to numerous observations on the inadequacy of current ways of thinking about functionalism in architecture and urban design Copiously illustrated the book puts forward this model and then goes on to discuss in detail each function of buildings and urban environments
