Organic Life and the Human Helmuth Plessner,2021-05-20 The groundbreaking classic of twentieth century German philosophy now available in English with an introduction by J M Bernstein Helmuth Plessner s Levels of Organic Life and the Human draws on phenomenological biological and social scientific sources to offer a systematic account of nature life and human existence The book considers non living nature plants non human animals and human beings a sequence of increasingly complex modes of boundary dynamics simply put interactions between a thing s insides and the surrounding world Living things are classed and analyzed by their positionality or orientation to and within an environment According to

Plessner's radical view the human form of life is excentric that is the relation between body and environment is something to which humans themselves are positioned and can take a position This excentric positionality enables human beings to take a stand outside the boundaries of their own body a possibility with significant implications for knowledge culture religion and technology A powerful and sophisticated account of embodiment the Levels shows with reference both to science and to philosophy how life can be seen on its own terms to establish its own boundaries and how from the standpoint of life the human establishes itself in relation to the nonhuman As such the book is not merely a historical monument but a source for invigorating a range of vital current conversations around the animal posthumanism the material turn and the biology and sociology of cognition

The Philosophy of Redemption Philipp Mainländer, 2024-01-16 Philipp Mainländer set down in his Philosophy of Redemption an ambitious philosophical vision He claimed not only to confirm the teachings of Buddhism and Christianity but also to reconcile religion

with science and put atheism on a scientific foundation All this he integrates with a cosmology that reads the universe as the emanation of a primordial event which he construes as God's self destruction The universe is therefore the disintegrating relic of a divinity a discordant unity of individual beings egoistic manifestations of a will to death all striving for absolute annihilation Mainlander's bleak but rapturous prognosis is here published in English for the first time *Oral*
