Encyclopedia Of American Forest And Conservation History Volume Two:

Encyclopedia of American Forest and Conservation History Richard C. Davis, 1983 **The Johnson Years, Volume Two** Robert A. Divine, 1990-04-01 Stretching from November 1963 to January 1969 the administration of Lyndon Baines Johnson was marked both by division and tumult and by significant accomplishments In this volume Robert Divine has brought together seven senior scholars who in new essays explore aspects of domestic and foreign policy during the Johnson years This collection is a sequel to Divine s earlier volume originally published as *Exploring the Johnson Years* The seven essays that compose Volume Two together with Divine s incisive and perceptive historiographical overview offer new insights into Johnson s complex character and leadership style The LBJ that emerges from these pages is a very human figure who understands the corrosive pervasive impact of the Vietnam War on his administration and who struggles to try to preserve the domestic programs he fought so long and hard to achieve In exploring the antiwar movement tax and foreign economic policies environmental and health care questions and the space program these essays demonstrate how domestic issues were critically affected by the Vietnam War and provide a fuller understanding of Johnson s vital but flawed legacy to the nation

Encyclopedia of American Forest and Conservation History Richard C. Davis, 1983 **Beginnings of Range Management** David A. Prevedel, Curtis M. Johnson, 2005 **United States History** James Warren Oberly, 1995

American Environmental History Carolyn Merchant, 2007-10-31 By studying the many ways diverse peoples have changed shaped and conserved the natural world over time environmental historians provide insight into humanity s unique relationship with nature and more importantly are better able to understand the origins of our current environmental crisis Beginning with the precolonial land use practice of Native Americans and concluding with our twenty first century concerns over our global ecological crisis *American Environmental History* addresses contentious issues such as the preservation of the wilderness the expulsion of native peoples from national parks and population growth and considers the formative forces of gender race and class Entries address a range of topics from the impact of rice cultivation slavery and the growth of the automobile suburb to the effects of the Russian sea otter trade Columbia River salmon fisheries the environmental justice movement and globalization This illustrated reference is an essential companion for students interested in the ongoing transformation of the American landscape and the conflicts over its resources and conservation It makes rich use of the tools and resources climatic and geological data court records archaeological digs and the writings of naturalists that environmental historians rely on to conduct their research The volume also includes a compendium of significant people concepts events agencies and legislation and an extensive bibliography of critical films books and Web sites

Manufacturing David O. Whitten, Bessie E. Whitten, 1990-09-27 Overall this first volume in the series should render business research in manufacturing a good deal easier by bringing together insightful industry histories and detailed critical bibliographies This series has much to recommend it Future volumes will be eagerly awaited *Reference Books Bulletin* This

historical and bibliographical reference work is the first volume of Greenwood Press's Handbook of American Business History a series intended to supplement current bibliographic materials pertaining to business history Devoted to manufacturing this work uses the Enterprise Standard Industrial Classification ESIC to divide the subject into distinct segments from which contributors have developed histories and bibliographies of the different types of manufacturing Though authors were given sets of guidelines to follow they were also allowed the flexibility to work in a format that best suited the material Each contribution in this volume contains three important elements a concise history of the manufacturing sector a bibliographic essay and a bibliography Some contributions appear in three distinct parts while others are combined into one or two segments all build on currently available material for students and scholars doing research on business and industry The contributors who include business economic and social historians as well as engineers and lawyers have covered such topics as bakery products industrial chemicals and synthetics engines and turbines and household appliances Also included are an introductory essay that covers general works and a comprehensive index This book should be a useful tool for courses in business and industry and a valuable resource for college university and public libraries The Evolving Use and Management of the Nation's Forests, Grasslands, Croplands and Related Resources John Fedkiw, 1989

The Johnson Years: Vietnam, the environment, and science Robert A. Divine, 1987 Extractives, Manufacturing, and Services David O. Whitten, 1997-04-22 The second volume in the Handbook of American Business History series this book offers concise histories of extractive manufacturing and service industries as well as extensive bibliographic essays pointing to the leading sources on each industry and bibliographic checklists Supplementing other bibliographic materials in business history this volume provides researchers with a much needed path through the vast array of material available in the library and on the Internet Indicating which resources to check and which to bypass the book is a guide to a sometimes overwhelming amount of information Each of the book's chapters provides a concise industry history beginning with the industry's rise to importance in the U S and continuing to the present The bibliographic essays provide a narrative outline of the leading sources published or made available in archives libraries or museum collections since 1971 when Lovett's American Economic and Business History Information Sources was published Each discussion concludes with a bibliographic checklist of the titles mentioned in the essay as well as other titles In a rapidly expanding information society researchers teachers and students may be easily overwhelmed by the exhaustive material available in print and electronically What is useful and what can be ignored is a strategic question and few know where to begin This book provides a guide *The Southern Forest* Laurence C. Walker, 2014-07-03 When the first European explorers reached the southern shores of North America in the early seventeenth century they faced a solid forest that stretched all the way from the Atlantic coast to eastern Texas and Oklahoma The ways in which they and their descendants used and abused the forest over the next nearly four hundred years form the subject of *The Southern Forest* In chapters on the explorers pioneers lumbermen boatbuilders

and foresters Laurence Walker chronicles the constant demands that people have made on forest resources in the South He shows how the land s very abundance became its greatest liability as people overhunted the animals clearcut the forests and wore out the soil with unwise farming practices all in a mistaken belief that the forest s bounty including new ground to be broken was inexhaustible With the advent of professional forestry in the twentieth century however the southern forest has made a comeback A professional forester himself Walker speaks from experience of the difficulties that foresters face in balancing competing interests in the forest How for example does one reconcile the country s growing demand for paper products with the insistence of environmental groups that no trees be cut Should national forests be strictly recreational areas or can they support some industrial logging How do foresters avoid using chemical pesticides when the public protests such natural management practices as prescribed burning and tree cutting This personal view of the southern forest adds a new dimension to the study of southern history and culture The primeval southern forest is gone but with careful husbandry on the part of all users the regenerated southern forest may indeed prove to be the inexhaustible resource of which our ancestors dreamed

History Of Science In The U.S. Clark A. Elliott,2021-11-18 First published in 1996 The intention of this volume is two fold first to give a chronologically arranged overview of selected data on the history of science in the United States and second to orient the reader to the substantial reference literature and research sources as guidance to further study of the topic The subject areas that are covered include astronomy biology chemistry geology mathematics physics and their related disciplines areas such as anthropology and psychology are covered to a lesser extent Science is the central focus but the content of the work recognizes that the boundaries between subjects or activities are not absolute and certainly not when coverage spans several centuries

A Forestry History of Ten Wisconsin Indian Reservations Under the Great Lakes Agency Anthony Godfrey,1997 Natural Products of Woody Plants John W. Rowe,2012-12-06 Wood as found in trees and bushes was of primary importance to ancient humans in their struggle to control their environment Subsequent evolution through the Bronze and Iron Ages up to our present technologically advanced society has hardly diminished the importance of wood Today its role as a source of paper products furniture building materials and fuel is still of major significance Wood consists of a mixture of polymers often referred to as lignocellulose The cellulose microfibrils consist of an immensely strong linear polymer of glucose They are associated with smaller more complex polymers composed of various sugars called hemicelluloses These polysaccharides are embedded in an amorphous phenylpropane polymer lignin creating a remarkably strong composite structure the lignocellulosic cell wall Wood also contains materials that are largely extraneous to this lignocellulosic cell wall These extracellular substances can range from less than 10% to about 35% of the dry weight of the wood but the usual range is 2% 10% Among these components are the mineral constituents salts of calcium potassium sodium and other metals particularly those present in the soil where the tree is growing Some of the extraneous components of wood are too insoluble to be extracted by inert solvents and remain to give

extractive free wood its color very often these are high molecular weight polyphenolics

The Birth of Big Business in the United States, 1860-1914 David O. Whitten, Bessie E. Whitten, 2005-11-30 The economic and cultural roots of contemporary American business can be traced directly to developments in the era between the Civil War and World War I The physical expansion of the country combined with development of transportation and communication infrastructures to create a free market of vast proportion and businesses capable of capitalizing on the accompanying economies of scale through higher productivity lower costs and broader distribution The Birth of Big Business in the United States illuminates the conditions that changed the face of American business and the national economy giving rise to such titans as Standard Oil United States Steel American Tobacco and Sears Roebuck as well as institutions such as the United States Post Office During this period commercial banking and law also evolved and as the authors argue business and government were not antagonists but partners in creating mass consumer markets process innovations and regulatory frameworks to support economic growth The Birth of Big Business in the United States is not only an incisive account of modern business development but a fascinating glimpse into a dynamic period of American history

Sources for U.S. History W. B. Stephens, 2003-01-30 This book offers a detailed and comprehensive guide to contemporary sources for research into the history of individual nineteenth century U S communities large and small The book is arranged topically covering demography ethnicity and race land use and settlement religion education politics and local government industry trade and transportation and poverty health and crime and thus will be of great use to those investigating particular historical themes at national state or regional level As well as examining a wide variety of types of primary sources published and unpublished quantitative and qualitative available for the study of many places the book also provides information on certain specific sources and some individual collections in particular those of the National Archives

Americans and Their Forests Michael Williams, 1992-06-26 Dr Williams begins by exploring the role of the forest in American culture the symbols themes and concepts for example pioneer woodsman lumberjack wilderness generated by contact with the vast land of trees He considers the Indian use of the forest describing the ways in which native tribes altered it primarily through fire to promote a subsistence economy

The Forest Service Gerald W. Williams, 2006-11-30 Established in 1905 The Forest Service is steeped in history conflict strong personalities including Theodore Roosevelt and Gifford Pinchot and the challenges of managing 193 million acres of national forests and grasslands This unique federal agency is one that combines forest management with wildlife fish recreation mining grazing and hundreds of other uses It operates in the midst of controversy and change The original intent was to protect the public forests protect the water supplies and when appropriate provide timber Much has changed over the last 100 years including many new laws but the fact that these lands are still fought over today shows the foresight of politicians foresters scientists and communities This work brings to light the many and varied activities of the agency that many people know little about in a world that is constantly changing Written by a former Forest Service national historian topics discussed

in the work include wilderness and the Wilderness Act of 1964 recreation battles and interagency rivalry with the National Park Service timber management including clearcutting ecosystem management roadless area and controversies over RARE and RARE II studies fish and wildlife management including endangered species before and after the Endangered Species Act of 1973 and mining and the General Mining Act of 1872 It also discusses the future challenges forest fires water protection and restoration recreation involving the public and fish and wildlife *History Line*, 1995 **Timber and the Forest Service** David A. Clary, 1988-12-01 Nearly one quarter of America is covered with forests almost 800 million acres There are 151 national forests comprising close to 200 million acres in thirty nine states and Puerto Rico These protected lands are administered by the U S Forest Service an agency of the Department of Agriculture David Clary here examines the history of and controversies surrounding the Forest Service s policies for timber management in our national forests In this first in depth study of the political bureaucratic social and ideological relationships between the Forest Service and the production of timber Clary traces the continuity in the agency s outlook from its creation in 1905 through fears of a timber famine to the clear cutting controversies of the mid 1970s He shows convincingly that despite legislative remedies and agency reports timber production has remained the agency s first priority and that other multiple uses recreation watershed protection wilderness livestock grazing and wildlife management were regulated so that they would not interfere with potential timber harvests Throughout its history the agency is shown to have been enchanted with the objective of producing timber Clary s theme in what he describes as an administrative political scientific and anecdotal history is that the Forest Service exhibited consistent actions and attitudes over the years and failed to confront realistically changes in the national culture that altered what the American people wanted from the forests and the Forest Service
