Devouring Nature: On Assimilation and Consumption in Hegel's System Eduardo Assalone, 2025-08-07 In this book you will discover the deep connection between the concepts of assimilation and consumption in Hegel's philosophy Tracing their development across Hegel's system from the Logic and Philosophy of Nature to the Phenomenology of Spirit and Philosophy of Right the book shows that consumption is a fully actualized form of assimilation It argues that consumption is not merely a social practice but is rooted in ontological and normative structures revealing consumption as a way of culturally assimilating nature and shaping modern ethical life **German Philosophy of Language** Michael N. Forster, 2011-04-07 Michael

Forster here presents a ground breaking study of German philosophy of language in the nineteenth century and beyond His previous book After Herder showed that the eighteenth century philosopher J G Herder played the fundamental role in founding modern philosophy of language including new theories of interpretation hermeneutics and translation as well as in establishing such whole new disciplines concerned with language as anthropology and linguistics This new volume reveals that Herder's ideas continued to have a profound impact on such important nineteenth century thinkers as Friedrich Schlegel the leading German Romantic Wilhelm von Humboldt a founder of linguistics and G W F Hegel the leading German Idealist Forster shows that the most valuable ideas about language in this tradition were continuous with Herder's whereas

deviations from the latter that occurred tended to be inferior This book not only sets the historical record straight but also champions the Herderian tradition for its philosophical depth and breadth Strangers in a Familiar Land James A. Blumenstock,2020-04-28 Throughout history many Christians have existed on the margins of society deviants and strangers in lands they call home To survive they have had to construct alternate identities that not only make sense of their religious experiences and beliefs but also equip them to successfully negotiate their social worlds In Thailand a nation where social identities are thoroughly intertwined with Buddhist religious adherence Christians must come to terms with such a marginalized existence By leaving Buddhism and adopting what is considered a foreign faith Christian converts become deviants to normal Thai identity and belonging In response they have discovered creative solutions for traversing this complex terrain of marginalization This book presents a deep exploration of the phenomenon of marginalization as experienced by Thai Christian converts In it readers will follow participants through the heights of transformative religious experience the lows of severe social displacement the tensions of managing two disparate lifeworlds and two conflicting selves and the comfort and joy of finding a new place to call home In the end the reader will gain deep insight into what it is like to successfully navigate a minority religious identity on the margins of society Being and Intelligibility Albert Peter Pacelli,2017-10-03 What do we mean when we say that something is What is the meaning of human experience These two most elementary philosophical questions have perplexed thinkers for thousands of years Being and Intelligibility explores them from the simple premise that all entities are essentially logical in their being The book develops its three central theses that the beingness of beings called Being and the intelligibility of Being are one and the same that nothingness i e absolute not Being is self contradictory and unintelligible and therefore Being is logically necessary and that the fullness of human rational experience cannot be explained in materially reducible terms and requires recognition of the existence of transcendent reality which includes God as self grounding good will moral obligation and freedom and the souls of men Being and Intelligibility thoroughly investigates the implications of the essential logicity of Being including that human Being shows itself to itself from within itself as a substantive persistent morally obligated unity among the ordered manifold of its life experiences whose essential Being is orientation toward God The Architecture of Freedom Hassanal Ladha,2019-12-26 Through a radical reading of Hegel s oeuvre The Architecture of Freedom sets forth a theory of open borders centered on a new interpretation of the German philosopher s related conceptions of language and the aesthetic mastery and servitude and subjectivity and the state The book s argument turns on Hegel s identification of Africa as a fluid utopic space enabling the traversal of the East West binary As Hegel s figure for the non historical Africa emerges as the negativity that propels the movement of the dialectic in time Mirroring the shrouded continent s relation to history Kantian architectonics step out of the realm of logic in Hegelian thought and drive the historical unfolding of the aesthetic In a foundational move Hegel hypostatizes the aesthetic entanglement of built and linguistic form as the colossus of Memnon an

African warrior memorialized in ancient architecture myth and art Reaching for freedom the Memnon marks the architectonic modality through which the African slave at the telos of history will fulfill the spiritual promise of the human and bring about the politically mature state The book examines the syncretic figure of the Memnon and slave across Hegel's lecture courses the Phenomenology of Spirit the Encyclopedia and the Philosophy of Right Ultimately the book calls for a reassessment of a range of Hegelian philosophemes across disciplines in the humanities This book will be of particular interest to scholars in philosophy postcolonial and African studies political theory architecture and historiography

Reality's Fugue F. Samuel Brainard, 2017-10-15 Science religion philosophy these three categories of thought have organized humankind's search for meaning from time immemorial Reality's Fugue presents a compelling case that these ways of understanding often seen as competing are part of a larger puzzle that cannot be rendered by one account of reality alone This book begins with an overview of the concept of reality and the philosophical difficulties associated with attempts to account for it through any single worldview By clarifying the differences among first person third person and dualist understandings of reality F. Samuel Brainard repurposes the three predominant ways of making sense of those differences exclusionist only one worldview can be right inclusivist viewing other worldviews through the lens of one in order to incorporate them all and thus distorting them and pluralist or relativist holding that there are no universals and truth is relative His alternative mode of understanding uses Douglas Hofstadter's metaphor of a musical fugue that allows different voices and melodies of worldviews to coexist in counterpoint and conversation while each remains distinct with none privileged above the others Approaching reality in this way Brainard argues opens up the possibility for a multivoiced perspective that can overcome the skeptical challenges that metaphysical positions face Engagingly argued by a lifelong scholar of philosophy and global religions this edifying and accessible exploration of the nature of reality addresses deeply meaningful questions about belief reconciliation and being

A New German Idealism Adrian Johnston, 2018-05-01 In 2012 philosopher and public intellectual Slavoj Žižek published what arguably is his magnum opus the one thousand page tome Less Than Nothing Hegel and the Shadow of Dialectical Materialism A sizable sequel appeared in 2014 Absolute Recoil Towards a New Foundation of Dialectical Materialism In these two books Žižek returns to the German idealist G. Hegel in order to forge a new materialism for the twenty-first century Žižek's reinvention of Hegelian dialectics explores perennial and contemporary concerns humanity's relations with nature the place of human freedom the limits of rationality the roles of spirituality and religion and the prospects for radical sociopolitical change In A New German Idealism Adrian Johnston offers a first of its kind sustained critical response to Less Than Nothing and Absolute Recoil Johnston a leading authority on and interlocutor of Žižek assesses the recent return to Hegel against the backdrop of Kantian and post-Kantian German idealism He also presents alternate reconstructions of Hegel's positions that differ in important respects from Žižek's version of dialectical materialism In particular Johnston criticizes Žižek's

deviations from the secular naturalism and Enlightenment optimism of his chosen sources of inspiration not only Hegel but Karl Marx and Sigmund Freud too In response Johnston develops what he calls transcendental materialism an antireductive and leftist materialism capable of preserving and advancing the core legacies of the Hegelian Marxian and Freudian traditions central to i ek
