Torres, 2016 **Encyclopedia of Suicide** Oliver B. Torres, 2016 Suicide is a serious problem hallmarked by complexity and ranked as a leading cause of death worldwide International studies of suicide epidemiology show that suicide rates are generally greater in males than females and increase with age with the elderly having the highest suicide rates WHO 2002 The prevention of suicide is in part contingent on the ability to identify individuals and populations at high risk and to offer prompt effective interventions However evidence exists that suicidal individuals remain commonly undetected rendering appropriate intervention unlikely This encyclopedia presents important research on suicide **Current Catalog** National Library of Medicine (U.S.), 1993 **Handbook of Reference Sources and Services for Small and Medium-Sized Libraries** Margaret I. Nicholas, 1996-07 Lists over 750 sources focusing on the reference needs of adults The primary objective was to select quality reference tools which cover many different topics Topics include general works biography philosophy religion language literature visual arts applied sciences sports and recreation home life social customs and education **The Relativity of Deviance** John Curra, 2016-01-25 This engaging and informative book by award winning sociologist and criminologist John Curra offers a valuable perspective on attitudes and behaviors labeled as deviant The Relativity of Deviance Fourth Edition explores the meanings and constructions of social deviance and social reactions to it he answers such questions as What is deviance What comprises deviant behavior How are deviants treated How is deviance socially constructed and socially sustained Why is the same attitude behavior or condition praised in one situation and condemned in another Through insightful and thought provoking examples and informed accounts the author illustrates that deviance cannot be explained or understood in terms of absolutes or essential characteristics nor can it be explained or understood apart from its social setting This book approaches sex violence theft drugs suicide rape and mental disorders in a way that shows the critical role of sociocultural factors and social reactions in constructions of deviance and crime **Lives and Deaths** Antoon A. Leenaars, 2023-01-06 Edwin S Shneidman is recognized as the central figure in the field of suicidology His writings have taught countless psychologists and other health professionals about the complexity of suicide death and bereavement This collection of his writings spans the entirety of his career and offers a unique insight into the development of his thinking The material is broken down into five parts Psychological Assessment Logic Melville and Murray Suicide and Death and each section includes an introduction by the editor Lives and Deaths is a vital resource for those in suicidology and related fields allowing the reader to sample a variety

of selections from Shneidman's work in one compact volume. The book is ideal for classroom use by upper level undergraduates and graduate students in the history of suicidology or as a supplemental text in a general suicidology course. It is also of interest to clinicians treating high risk patients as well as a more general audience including psychologists, social workers, crisis counselors, and suicide prevention specialists. [The Preacher's Guide to Suicide](#) H. C. Johnson, 2022-03-18. This book makes the startling claim that the pulpit is the appropriate place to address suicide. In *A Preacher's Guide to Suicide*, Johnson chisels through the rusty prison bars of cultural pretense and the oppressive myths of suicide. Using history, the social and behavioral sciences, and biblical inquiry over the centuries of varied Christian voices, Johnson demonstrates that suicide is part of the very fabric of Christian identity. And to preach suicide awareness is to preach life into the very act of dying. While grappling with the contemporary understanding of neuroscience, psychopathology, societal values, and individualism, Johnson seeks to present suicide in a hopeful light as we all approach death in those daily moments of confession, forgiveness, and prayer. Johnson hopes to provoke further conversation within the Christian community about the richness of suicide within the Scriptures and seeks to be a source of inspiration for preachers. **Comprehensive Textbook of Suicidology** Alan Lee Berman, Morton M. Silverman, Bruce Michael Bongar, 2000-08-10. Multidisciplinary and comprehensive in scope, this volume serves as an authoritative overview of scientific knowledge about suicide and its prevention, providing a foundation in theory, research, and clinical applications. Issues relevant to clinical case management are highlighted, and various treatment modalities are discussed in light of the latest research findings. **The Dynamics of Murder** R. Barri Flowers, 2012-11-26. In recent years, there has been a surge in school shootings, workplace homicides, hate violence, and deadly terrorist attacks in the United States. This has resulted in a greater focus on homicidal behavior, its antecedents, ways to recognize warning signs of at-risk victims and offenders, and preventive measures. It has also led to increased effort. **Abnormal Psychology across the Ages** Thomas G. Plante Ph.D., 2013-06-25. In these three volumes, a team of scholars provides a thoughtful history of abnormal psychology, demonstrating how concepts regarding disordered mental states, their causes, and their treatments developed and evolved across the ages. Compiling current thought from some of the best minds in the field, *Abnormal Psychology across the Ages* provides essays that reflect on multiple dimensions of abnormal behavior. These experts present biological, psychological, social, cultural, and supernatural perspectives throughout human history on a range of disorders, as well as the global influences on scientific thinking. A fascinating read for anyone in the field of abnormal psychology, from undergraduate students to clinicians, counselors, psychologists, and psychiatrists, this three-volume work addresses questions such as: What is abnormal psychology and thinking? What are the causes? How have we treated it, and how do we treat it now? And how does the culture of the times affect what we perceive as abnormality? [The Last Dance](#) Lynne Ann DeSpelder, Albert Lee Strickland, 1996. New edition of a basic text surveying attitudes, cross-cultural and historical perspectives, socialization, health care systems, living with life-threatening illness, funerals, and body disposition.
