vascular bed is further transformed and enlarged till delivery and here again immunological cytokines do play a major role and can eventually cause immune mediated abortion Failure of not just the cytokine and cell recognition mediated dialogue but also the pre and peri implantation preparation of the uterus as stated leads to sterility early pregnancy loss and recurrent abortions There is also an increasingly stronger argument to implicate immunology in pre eclampsia Further still immunology is also implicated in the control of local infection mother to child transmission of pathogens notably but not limited to HIV Finally pregnancy is the only known physiological phenomenon where the once named suppressor T cells re emerge as regulatory T cells and play a cardinal role This E book provides a complete compendium of gynecological immunology spanning from fecundation to delivery Topics also include the role of various cell types such as T regs ad NK cells in implantation and uterine changes as well as the genetic regulation of immunological processes As such it will be of interest not only to fundamental and reproductive immunologists but more importantly clinicians in obstetrics and gynecology
