Leaders and International Conflict Giacomo Chiozza, H. E. Goemans, 2011-08-18 Chiozza and Goemans seek to explain why and when political leaders decide to initiate international crises and wars They argue that the fate of leaders and the way leadership changes shapes leaders decisions to initiate international conflict Leaders who anticipate

regular removal from office through elections for example have little to gain and much to lose from international conflict whereas leaders who anticipate a forcible removal from office such as through coup or revolution have little to lose and much to gain from conflict This theory is tested against an extensive analysis of more than 80 years of international conflict and with an intensive historical examination of Central American leaders from 1848 to 1918 Leaders and International Conflict highlights the political nature of the choice between war and peace and will appeal to all scholars of international relations and comparative politics

King of the Mountain Arnold M. Ludwig, 2013-07-24 People may choose to ignore their animal heritage by interpreting their behavior as divinely inspired socially purposeful or even self serving all of which they attribute to being human but they masticate fornicate and procreate much as chimps and apes do so they should have little cause to get upset if they learn that they act like other primates when they politically agitate debate abdicate placate and administrate too King of the Mountain presents the startling findings of Arnold M Ludwig s eighteen year investigation into why people want to rule The answer may seem obvious power privilege and perks but any adequate answer also needs to explain why so many rulers cling to power even when they are miserable trust nobody feel besieged and face almost certain death Ludwig s results suggest that leaders of nations tend to act remarkably like monkeys and apes in the way they come to power govern and rule Profiling every ruler of a recognized country in the twentieth century over 1 900 people in all Ludwig establishes how rulers came to power how they lost power the dangers they faced and the odds of their being assassinated committing suicide or dying a natural death Then concentrating on a smaller sub set of 377 rulers for whom more extensive personal information was available he compares six different kinds of leaders examining their characteristics their childhoods and their mental stability or instability to identify the main predictors of later political success Ludwig s penetrating observations though presented in a lighthearted and entertaining way offer important insight into why humans have engaged in war throughout recorded history as well as suggesting how they might live together in peace

Leadership Ethics Terry L. Price, 2008-07-03 Are leaders morally special Is there something ethically distinctive about the relationship between leaders and followers Should leaders do whatever it takes to achieve group goals Leadership Ethics uses moral theory as well as empirical research in psychology to evaluate the reasons everyday leaders give to justify breaking the rules Written for people without a background in philosophy it introduces readers to the moral theories that are relevant to leadership ethics relativism amoralism egoism virtue ethics social contract theory situation ethics communitarianism and cosmopolitan

theories such as utilitarianism and transformational leadership Unlike many introductory texts the book does more than simply acquaint readers with different approaches to leadership ethics It defends the Kantian view that everyday leaders are not justified in breaking the moral rules

Catastrophic Success Alexander B. Downes,2021-12-15 In Catastrophic Success Alexander B Downes compiles all instances of regime change around the world over the past two centuries Drawing on this impressive data set Downes shows that regime change increases the likelihood of civil war and violent leader removal in target states and fails to reduce the probability of conflict between intervening states and their targets As Downes demonstrates when a state confronts an obstinate or dangerous adversary the lure of toppling its government and establishing a friendly administration is strong The historical record however shows that foreign imposed regime change is in the long term neither cheap easy nor consistently successful The strategic impulse to forcibly oust antagonistic or non compliant regimes overlooks two key facts First the act of overthrowing a foreign government sometimes causes its military to disintegrate sending thousands of armed men into the countryside where they often wage an insurgency against the intervener Second externally imposed leaders face a domestic audience in addition to an external one and the two typically want different things These divergent preferences place imposed leaders in a quandary taking actions that please one invariably alienates the other Regime change thus drives a wedge between external patrons and their domestic protégés or between protégés and their people Catastrophic Success provides sober counsel for leaders and diplomats Regime change may appear an expeditious solution but states are usually better off relying on other tools of influence such as diplomacy Regime change Downes urges should be reserved for exceptional cases Interveners must recognize that absent a rare set of promising preconditions regime change often instigates a new period of uncertainty and conflict that impedes their interests from being realized

Predicting Leader Survival in Covert Operations from Congo to Cuba Joy S. Patton,2022-02-25 The life of a ruler is ephemeral A lucky few exit office through retirement or old age but most rulers have short tenures often ended by violent means The overthrow of rulers by their rivals is a common theme throughout world history and this strategy remains a popular choice in contemporary warfare However despite the frequency of regime change very little is discussed in international relations about covert regime change and its effects on leader survival Predicting Leader Survival in Covert Operations from Congo to Cuba explores the unique relationship between covert action and leader survival specifically discussing how leadership styles and personality traits influence this relationship
