Miguel Angel Aragonés ,2001 Miguel Angel Aragonés creates constructions that hold time still that capture the idle glance and invite the observer To engage in a careful and considered evaluation of their elements His buildings force the observer to perceive every possible perspective and to engage in an analysis of the details Aragonés studio is sited in Mexico City

Zeidler Roberts Partnership ,1999 Social ethics are directly confronted with a careful analysis of technological formal developments in modern day urban culture in the architecture of Zeidler Roberts Partnership Architects

Rebecca Binder ,1999 In Binder s most recent projects there continues to be a systematic rigor of several levels but also a movement toward a looser more intuitive idiosyncratic architecture

Jean Claude Pondevie Mario Arnaboldi,Jean Claude Pondevie,1999 Jean Claude Pondevie s architecture expresses the underlying motivation of modern design through a profound concern for the natural and historical contexts in which his works are grounded Pondevie draws inspiration from the great architecture of the 20th century bearing the signature of Le Corbusier Gropius and Terragni whose underlying premises are relaunched in a most up to date idiom

Sasaki Sasaki Associates,2001 From the basis Sasaki has produces a body of work that represents successful solutions to some of the major planning and design challenges of the closing decades of the century

Ed Carpenter ,2000 Each of Ed Carpenter s installations is an emotional intervention into the architecture intrinsic to the space while also an artistic overlay His art re interprets the space creating sub texts and spatial complexity using varieties of scale color light material and depth to articulate his response to each place Working in glass aluminium stainless steel cables and computer controlled lighting his vocabulary blends seamlessly into the language of architecture Each piece seems to grow from its place reach for the light and breath its own life The imagery evoked is simultaneously technological and biological engineered and expressive This book presents the portion of Carpenter s work which is specifically concerned with light and architectural sculpture leaving for another effort a number of projects such as bridges and urban sculptures which have other primary concerns
