This book gives you tools BMS maps programs JCL etc you can easily copy to your own data sets compile or assemble and execute with little or no change And it teaches you how to develop similar tools yourself These utilities solve practical problems commonly faced by application and system programmers and analysts in MVS and DOS VSE environments *VSE JCL and Subroutines for Application Programmers* Leo J. Langevin,1992 This report describes the results of a survey of 1 000 multinational corporations undertaken in 1992 which asked about the importance of environmental issues in investment decisions The survey shows that most large corporations look systematically at environmental questions when they decide where to invest Environmental problems appear to have discouraged a number of investments across different industries and the question of liability for past pollution problems at industrial sites was the greatest concern for investors **IMS Design**
