Emergence The Connected Lives Of Ants Brains Cities And Software:

Emergence Steven Johnson,2001 In the tradition of Being Digital and The Tipping Point comes a groundbreaking and engaging book that makes sense of the cutting edge theory of emergence and demonstrates its relevance in today s world

Emergence Steven Johnson,2001 Emergence is what happens when an interconnected system of relatively simple elements self organizes to form more intelligent more adaptive higher level behavior It s a bottom up model rather than being engineered by a general or a master planner emergence begins at the ground level Systems that at first glance seem vastly different ant colonies human brains cities immune systems all turn out to follow the rules of emergence In each of these systems agents residing on one scale start producing behavior that lies a scale above them ants create colonies urbanites create neighborhoods Author Steven Johnson takes readers on an eye opening intellectual journey from the discovery of emergence to its applications He introduces us to our everyday surroundings offering surprising examples of feedback self organization and adaptive learning Drawing upon evolutionary theory urban studies neuroscience and computer games Emergence is a guidebook to one of the key components of twenty first century culture Until recently Johnson explains the disparate philosophers of emergence have worked to interpret the world But today they are starting to change it This book is the riveting story of that change and what it means for the future Beem Raju Pookottil,2013-02-01

Biological Emergence Based Evolutionary Mechanism How species direct their own evolution **Masterplanning the Adaptive City** Tom Verebes,2013-10-08 Computational design has become widely accepted into mainstream architecture but this is the first book to advocate applying it to create adaptable masterplans for rapid urban growth urban heterogeneity through computational urbanism Practitioners and researchers here discuss ideas from the fields of architecture urbanism the natural sciences computer science economics and mathematics to find solutions for managing urban change in Asia and developing countries throughout the world Divided into four parts historical and theoretical background our current situation methodologies and prototypical practices the book includes a series of essays interviews built case studies and original research to accompany chapters written by editor Tom Verebes to give you the most comprehensive overview of this approach Essays by Marina Lathouri Jorge Fiori Jonathan Solomon Patrik Schumacher Peter Trummer and David Jason Gerber Interviews with Dana Cuff Xu Wei Guo Matthew Prior Tom Barker Su Yunsheng and Brett Steele Built case studies by Zaha Hadid Architects James Corner Field Operations XWG Studio MAD OCEAN Consultancy Network Plasma Studio Groundlab Peter Trummer Serie Architects dotA and Rocker Lange Architects **DHL** Po Chung,Roger Bowie,2017-12-18 DHL From Startup to Global Upstart is the story of a startup that became the first worldwide logistics service organization fighting regulation trade restrictions customs and many other technical issues to develop processes that have stood the test of time to become the accepted norm in delivery throughout the world It is a story of using soft powers persuasion and ingenuity working with and around emerging technologies to eliminate barriers to success This book provides an

extraordinary look into how a little startup with grit and perseverance succeeded in the face of overwhelming odds and revolutionized many of what are now accepted transportation and supply chain practices Po Chung DHL International co founder and Roger Bowie former DHL Worldwide Services Director discuss how DHL paved the way for one day international package delivery and how they have maintained their global leadership position against powerful American titans *The Urbanism Reader* Stefan Al,Tom Verebes,2025-02-06 Positioning design at the center of the debate *The Urbanism Reader* brings together classic and contemporary readings to help designers understand the complexities of cities and urban design in the 21st century The selection of readings presented here is uniquely tailored to a design perspective for architects and urban designers balancing social issues in urbanism with a clear focus on foregrounding design as an instrument for change in cities and examining the outcomes and challenges of recent design theories design methods and technologies in the built urban environment Covering today s most urgent issues 45 texts explore key topics in urbanism from digital design technologies to smart cities from the ongoing ecological crisis to public health and the impact of Covid 19 and from emergence and informality to economic inequity in global cities Chapters cover cultural issues including diversity indigenous knowledge decolonization social justice and inclusion alongside technological developments while a final chapter speculates on the future of urbanism through readings in AI virtual reality and the frontiers of current thinking in architecture and urban design The extracts are grouped by theme each with an introduction to the historical contexts and guiding paradigms helping design students researchers and professionals to make sense of the diverse field of theory and practice in the past present and future of global urbanism **Power and Place in the Prehistoric Aegean and Beyond** Susan E. Allen,R. Angus K. Smith,Robert Schon,2025-04-30 This volume celebrates the contributions and impact of our mentor colleague and friend James C Wright on the field of Aegean Bronze archaeology in recognition of his retirement from Bryn Mawr College The title and thematic orientation reflect his scholarly attention to power inequalities in the past particularly as manifested through social access to architectural spaces and landscapes The title acknowledges that Jim s interests and contributions extend beyond the domain of Aegean Prehistory not only in terms of chronology and geography but also in terms of his methodological approaches that have wider application In addition to Jim s colleagues and collaborators more than half of the contributions to the volume are by his students who collectively are but one of many signs of his profound and lasting impact not only on our scholarship but on the discipline of archaeology itself **The Age of Intelligent Cities** Nicos Komninos,2014-08-27 This book concludes a trilogy that began with *Intelligent Cities Innovation Knowledge Systems and digital spaces* Routledge 2002 and *Intelligent Cities and Globalisation of Innovation Networks* Routledge 2008 Together these books examine intelligent cities as environments of innovation and collaborative problem solving In this final book the focus is on planning strategy and governance of intelligent cities Divided into three parts each section elaborates upon complementary aspects of intelligent city strategy and planning Part I is about the drivers and architectures of the spatial

intelligence of cities while Part II turns to planning processes and discusses top down and bottom up planning for intelligent cities Cities such as Amsterdam Manchester Stockholm and Helsinki are examples of cities that have used bottom up planning through the gradual implementation of successive initiatives for regeneration On the other hand Living PlanIT Neapolis in Cyprus and Saudi Arabia intelligent cities have started with the top down approach setting up urban operating systems and common central platforms Part III focuses on intelligent city strategies how cities should manage the drivers of spatial intelligence create smart environments mobilise communities and offer new solutions to address city problems Main findings of the book are related to a series of models which capture fundamental aspects of intelligent cities making and operation These models consider structure function planning strategies toward intelligent environments and a model of governance based on mobilisation of communities knowledge architectures and innovation cycles

City Design Jonathan Barnett, 2016-01-08 City Design describes the history and current practice of the four most widely accepted approaches to city design the Modernist city of towers and highways that beginning in the 1920s has come to dominate urban development worldwide but is criticized as mechanical and soul less the Traditional organization of cities as streets and public places scorned by the modernists but being revived today for its human scale Green city design whose history can be traced back thousands of years in Asia but is becoming increasingly important everywhere as sustainability and the preservation of the planet are recognized as basic issues and finally Systems city design which includes infrastructure and development regulation but also includes computer aided techniques which give designers new tools for managing the complexity of cities This new revised edition of City Design includes a larger format and improved interior design allowing for better image quality The author has also included wider global coverage and context with more international examples throughout as well as new coverage on designing for informal settlements and new research conclusions about the immediacy of sea level rise and other climate change issues that affect cities which sharpen the need for design measures discussed in the book Authoritative yet accessible City Design covers complicated issues of theory and practice and its approach is objective and inclusive This is a comprehensive text on city design ideal for planners landscape architects urban designers and those who want to understand how to improve cities

The Cognitive Science of Religion James A. Van Slyke, 2016-03-23 The cognitive science of religion is a relatively new academic field in the study of the origins and causes of religious belief and behaviour The focal point of empirical research is the role of basic human cognitive functions in the formation and transmission of religious beliefs However many theologians and religious scholars are concerned that this perspective will reduce and replace explanations based in religious traditions, beliefs and values This book attempts to bridge the reductionist divide between science and religion through examination and critique of different aspects of the cognitive science of religion and offers a conciliatory approach that investigates the multiple causal factors involved in the emergence of religion

Doc-Humanity Maurizio Ferraris, 2022-09-12 However you view the present time it is a new century, a new world and also a new humanity in fact humanity is not something that was ever defined once and for all but remains an open project For several decades we have been witnessing a revolution However unlike the political and ideological revolutions that took place around the First World War this is a technological and much more radical one that does not depend on people's beliefs but rather on the tireless labour of machines The rise of automation has brought about a revelation of something that had hitherto remained hidden in the workshops of homo faber That is there are very few functions apart from consumption where

a machine cannot replace a human being because these material or spiritual machines need energy but they can also do without it whereas humans die if deprived of it or one can imagine a machine producing symphonies but not enjoying them So while human beings are still needed their roles and scopes have to be reconsidered Workers may be superfluous but humans are still needed including those who until recently only recognised themselves as producers The exclusion of workers from production does not discount humans being able to produce value in the form of consumption Recognising this will enable us to conceive the Webfare a new digital system that will teach us to find new names and new forms more tolerance and room for traditional human needs Above all it will teach us how to transform the time given to us by automation into an opportunity for progress
