

## ГЛОБАЛЬНЫЕ ЭКОЛОГИЧЕСКИЕ ПРОБЛЕМЫ СОВРЕМЕННОСТИ: ХАРАКТЕРИСТИКА И ОСНОВНЫЕ НАПРАВЛЕНИЯ ПРЕОДОЛЕНИЯ

*Сарапкина Ю. А.*

*Крымский филиал Краснодарского университета МВД России*

В статье исследуются теоретические и практические вопросы преодоления глобальных экологических проблем, в частности: сокращение озонового слоя и загрязнение атмосферы, изменение климата, сохранение биоразнообразия, кислотные дожди, опустынивание, также обозначаются основные направления их разрешения.

**Ключевые слова:** глобальные экологические проблемы, сокращение озонового слоя и загрязнение атмосферы, трансграничное перемещение загрязняющих веществ, изменение климата, сохранение биоразнообразия, кислотные дожди, опустынивание, ресурсный кризис.

Составляющей экологической системы планеты является природная среда. Современное состояние природной среды характеризуется наличием глобальных экологических проблем: сокращение озонового слоя и загрязнение атмосферы, трансграничное перемещение загрязняющих веществ, изменение климата, сохранение биоразнообразия, кислотные дожди, опустынивание, ресурсный кризис и т. п. Указанные проблемы сегодня вызывают особую озабоченность со стороны мирового сообщества, поскольку являются результатом антропогенной деятельности, зачастую противоречащей законам природы. Указанные экологические проблемы ни одно государство не в состоянии преодолеть самостоятельно, поскольку в их основе лежат явления и процессы планетарного масштаба. Именно поэтому их преодоление возможно лишь при участии всего мирового сообщества путем выработки согласованной международной экологической политики, основывающейся на эффективных организационно-правовых методах и средствах. О необходимости совместных действий по предотвращению разрушения планетарной экологической системы говорил в начале XX века В. И. Вернадский [1].

На сегодняшний день большинство стран задействовано в разрешении глобальных экологических проблем и на основе международного сотрудничества определяют рациональные нормы природопользования.

Необходимо отметить, что ведущую роль в международном экологическом сотрудничестве играет ООН, органы которой занимаются, в том числе, и вопросами охраны окружающей среды. В ООН существует и специальная программа по охране окружающей среды – ЮНЕП. Сегодня вопросами охраны окружающей среды занимается и Международный союз охраны природы и природных ресурсов, который был создан еще в 1956 году.
