Entre los aspectos novedosos de esta edición cabe destacar la incorporación de nuevos capítulos de consulta prenatal, asistencia al embarazo en situaciones especiales como trastornos alimentarios, sobrepeso y edades extremas de la vida reproductiva, asistencia al parto normal en el que se introduce el concepto de plan de parto y enfermedades neoplásicas durante el embarazo. Además tienen mucho valor sendos capítulos sobre los dilemas bioéticos y los aspectos legales en esta especialidad. Contenido altamente reconocido tanto en España como en América Latina que está dirigido a ginecólogos en ejercicio residentes de la especialidad y también a estudiantes de Medicina.

Nutrition in the Prevention and Treatment of Cardiovascular Diseases Zhendong Liu, Changwei Li, Jichun Chen, 2024-07-18 Cardiovascular diseases (CVDs) are one of the leading causes of death worldwide which brings about a major public health burden. An increasing body of literature suggests that nutritional factors strongly affect CVD risks and progression. There is consensus among researchers that nutritional deficiency as well as nutritional excess both increase the risk of CVDs. In addition, it is increasingly recognized that not only nutrients but also dietary patterns play a role in CVDs. Furthermore, nutritional status and diet quality is also becoming a concern in regard to CVD development and outcomes. However, CVDs are complicated diseases with various causes which leads to inconsistencies in determining the best nutritional practice. Further research is required to identify effective ways of improving nutritional status in order to prevent delay or reduce adverse outcomes of CVDs. The goal of this research topic is to highlight the central role of nutrition in both primary and secondary prevention of CVDs. We will focus on the latest evidence from observational and clinical studies regarding the influence of nutrients, dietary patterns, diet quality, nutritional status on CVDs development and outcomes. We hope to showcase research progress, identify the feasibility and impact of nutritional interventions and shed light on future directions for research.
