Egyptian Legends and Folktales Omar Khalil, In ancient Egyptian mythology the creation of the world was a profound and mystical event explained through various narratives rooted in different regions These myths aimed to answer fundamental questions about existence the origins of the gods and humanity s place within the universe Among the most significant are the myths from Heliopolis Hermopolis and Memphis each offering a unique perspective on creation The Ennead of Heliopolis tells the story of creation centered around Atum the first god who emerged from the chaotic waters of Nun Atum often depicted as a self created deity brought forth the twin deities Shu god of air and Tefnut goddess of moisture by spitting or coughing them out These two then gave birth to Geb the earth god and Nut the sky goddess From their union came Osiris Isis Set and Nephthys forming the Ennead a group of nine deities This myth emphasizes the power of creation through divine will and the subsequent emergence of order from chaos In Hermopolis the Ogdoad myth presents a different version of creation Here eight primordial deities existed in male and female pairs representing elements like darkness water and chaos These pairs were Amun and Amaunet Heh and Hauhet Kek and Kauket and Nun and Naunet They resided in the watery abyss before merging their powers to create a primordial mound from which the sun god Ra emerged illuminating the world This story highlights the collaboration of fundamental forces to bring forth light and life

Children's Picture Books and Contemporary Egyptian Society Yasmine Motawy,2025-02-25 A social and political history of two decades of Egyptian neoliberalism through children s picture books published in Egypt in the post 2000 era Children s picture books are some of

the most transparently ideological materials available to parents and educators and as cultural objects they are an expression of the zeitgeist of a particular era They reveal much about the hopes values and aspirations of the society that produces them as well as that society's vision of its place in the wider world at large Children's Picture Books and Contemporary Egyptian Society examines a new wave of Egyptian picture books that was published in the current century to see how these books responded to larger societal trends and transformations in Egypt as well as to explore the ideologies that lie behind them Yasmine Motawy argues that a host of factors including the growth of gated communities and international schooling the proliferation of lucrative literary awards returning Gulf migrants television dramas and nationwide reading advocacy initiatives helped give rise to a new kind of children's picture book in Egypt Motawy focuses on three clusters of selected picture books to investigate the extent to which these books reproduce hegemonic discourses or alternatively open up new horizons of childhood agency and societal transformation The first cluster includes books that directly socialize the child by showing them how things are done in both the domestic sphere and the increasing globalized spaces that children frequent with their families The second cluster aims at reframing cultural notions around femininity through the retelling of folk and fairy tales while the third cluster addresses children's abilities to assess the impact of their actions on their environment and invites them to examine their personal suitability to positions of power and stewardship

The Folktale Stith Thompson, 1977 As interest in folklore increases the folktale acquires greater significance for students and teachers of literature The material is massive and scattered thus few students or teachers have accessibility to other than small segments or singular tales or material they find buried in archives Stith Thompson has divided his book into four sections which permit both the novice and the teacher to examine oral tradition and its manifestation in folklore The introductory section discusses the nature and forms of the folktale A comprehensive second part traces the folktale geographically from Ireland to India giving culturally diverse examples of the forms presented in the first part The examples are followed by the analysis of several themes in such tales from North American Indian cultures The concluding section treats theories of the folktale the collection and classification of folk narrative and then analyzes the living folklore process This work will appeal to students of the sociology of literature professors of comparative literature and general readers interested in folklore
