**The Beast** Robert Stallman, 2022-08-23 A shapeshifter learns he is not alone on earth in the finale of this acclaimed science fiction trilogy for fans of Ray Bradbury and Theodore Sturgeon The shapeshifting beast's human form has settled down in Albuquerque Barry Golden is a loving husband and father and a reporter for the local paper but the beast still hunts at night One evening in the desert he receives a stunning revelation he is not alone There are others like him And he must find a mate and prepare for something called The Leap Meanwhile in Chicago George Beaumont is dying of cancer His desperate search for a miracle leads him to a strange creature who offers to save his life and to a mysterious young woman named Lilly who guides him through a peculiar alternative therapy until he is finally cured George wants nothing more than to spend the rest of his life with Lilly but she feels a call from the Other someone waiting for her In New Mexico big changes await two creatures who once thought they were alone in the world but have now found each other at last Praise for Robert Stallman Stallman reminds me of Ray Bradbury A big talent Peter Straub coauthor of The Talisman An exciting blend of love and violence of sensitivity and savagery Fritz Leiber author of Swords and Devilry The Orphan is frank violent and at times erotic in jarring unexpected ways The bottom line Highly recommended

*Feeling Pleasures* Joe Moshenska, 2014-10-30 The sense of touch had a deeply uncertain status in the sixteenth and seventeenth centuries It had long been seen as the most certain and reliable of the senses and also as biologically necessary each of the other senses could be relinquished but to lose touch was to lose life itself Alternatively touch was seen as dangerously bodily and too fully involved in sensual and sexual pleasures to be of true worth *Feeling Pleasures* argues that this tension came to the fore during the English Renaissance and allowed some of the central debates of this period surrounding the nature of human experience of the material world and of the relationship between the human and the divine to proceed through discussions of touch It also argues that the unstable status of touch was of particular import to the poetry of this period By bringing touch to the fore in a period usually associated with the dominance of vision and optics Joe Moshenska offers reconsiderations of major English poets especially Edmund Spenser and John Milton while exploring a range of spheres in which touch assumed new significance These include theological debates surrounding relics and the Eucharist in the work of Erasmus Thomas Cranmer and Lancelot Andrewes the philosophical history of tickling the touching of paintings and sculptures in a European context faith healing and experimental science and the early reception of Chinese medicine in England

**On the Right Track**, 1995 **How That Robot Made Me Feel** Ericka Johnson, 2025-05-20 An edited collection that explores what emotions we have when encountering robots how we react emotionally to them in different contexts and why these emotional responses are so important Do robots or the AI that is driving them have emotions That is a hotly debated topic both in science fiction where such assertions are a staple of the narrative and in tech development where it often makes headlines But what about how we humans emotionally respond to robots Are our emotional responses

any less important when it comes to how the robots we encounter today are designed In How That Robot Made Me Feel Ericka Johnson asks the authors in this collection to critically examine our emotional and affective responses to robots and what such an examination would do to the way roboticists use or toy with our emotions in their design decisions The narrative arc of this anthology follows the question of just whose emotions are being engaged through robotic interactions why and for what design ends Of course the answer is that it is our emotions that are interesting And these emotions are not universal despite the historically universalist paradigm of AI and how robotic emotions work Emotions are contingent to borrow a commonly used phrase in feminist technoscience They are placed in space time and cultural context And understanding how they are produced and engaged with will help clarify many of the political aspects of robotic interaction that are currently concealed by the shiny and allegedly neutral surfaces of robots
