Fondements Topologiques De La Peinture:

The Semiotic Web 1987 Thomas A. Sebeok, Jean Umiker-Sebeok, 2010-10-06 No detailed description available for The Semiotic Web 1987

Semiotics of Visual Language Fernande Saint-Martin, 1990-10-22 the details of Saint Martin's argument contain a wealth of penetrating observations from which anyone with a serious interest in visual communication will profit Journal of Communication Saint Martin elucidates a syntax of visual language that sheds new light on nonverbal language as a form of representation and communication She describes the evolution of this language in the visual arts as well as its multiple uses in contemporary media The result is a completely new approach for scholars and practitioners of the visual arts eager to decode the many forms of visual communication

Morphodynamics in Aesthetics Stefania Caliendo, 2019-12-12 This book deals with the complexity of art by focusing on the singularity of the work of art Gathering a selection of writings in art theory and semiotics it explores the question of apprehending art from its perceptual aspects to aesthetic comprehension and understanding Theoretical enquiries focus in particular on the dynamics of the perception of forms the semiotic value of colour the aesthetic phenomenon of empathy the function of vision in relation to other senses and its faculty to lead in a substantial way to the embodiment of sense These theoretical points are constantly observed with reference to the analysis of works of art especially from the beginning of the modern era when a renovated psychophysical approach oriented the evolution of contemporary aesthetics Research into art theories sheds light on how differentials in topologic positions dimensions relationships and tones contribute to the arising of forms and colours in perception and affect the perceiver The essays presented address in different ways the emergence of sense by conceiving it as deeply anchored to the dynamics of perception in addition to the cognitive disposition and knowledge regardless of whether or not the subject artist or beholder is aware of these processes Through in depth analyses identifying to what extent the aesthetic moment builds on perceptual and semiotic processes works of art are revealed to be singularities reflecting the correlation with morphodynamics in the sciences

Emerging Visions of the Aesthetic Process Gerald C. Cupchik, Janos László, 1992-09-25 Emerging Visions of the Aesthetic Process explores the processes underlying aesthetics and play from the perspectives of psychologists philosophers and semiologists It reveals the different ways in which scholars think about the following questions 1 What is the origin of the creative process 2 How do biological social and cognitive processes shape the activities of artists and the responses of viewers 3 How does literary activity draw on our experiences of everyday life and how is it tied to other kinds of media 4 How does play affect the process of growth from childhood to adulthood The contributors consider artistic literary and play activity from its most biological roots through individual cognitive and emotional processing to its expression at the social level Emerging Visions of the Aesthetic Process offers a stimulating basis for the discussion of aesthetic processes and will serve as an integrative comprehensive treatise on the topic for researchers and students

The Poetics of Perspective James Elkins, 2018-10-18 Perspective has been a divided subject orphaned among

various disciplines from philosophy to gardening In the first book to bring together recent thinking on perspective from such fields as art history literary theory aesthetics psychology and the history of mathematics James Elkins leads us to a new understanding of how we talk about pictures Elkins provides an abundantly illustrated history of the theory and practice of perspective Looking at key texts from the Renaissance to the present he traces a fundamental historical change that took place in the way in which perspective was conceptualized first a technique for constructing pictures it slowly became a metaphor for subjectivity That gradual transformation he observes has led to the rifts that today separate those who understand perspective as a historical or formal property of pictures from those who see it as a linguistic cognitive or epistemological metaphor Elkins considers how the principal concepts of perspective have been rewritten in work by Erwin Panofsky Hubert Damisch Martin Jay Paul Ricoeur Jacques Lacan Maurice Merleau Ponty and E H Gombrich The Poetics of Perspective illustrates that perspective is an unusual kind of subject it exists as a coherent idea but no one discipline offers an adequate exposition of it Rather than presenting perspective as a resonant metaphor for subjectivity a painter's tool without meaning a disused historical practice or a model for vision and representation Elkins proposes a comprehensive revaluation The perspective he describes is at once a series of specific pictorial decisions and a powerful figure for our knowledge of the world
