

# Food insecurity and climate change

<p><b>Global food security</b></p> <p>Food security is a complex issue, involving many different factors. It is not just about having enough food to eat, but also about having access to that food. This means having enough money to buy food, and having enough land to grow food. Food security is also about having access to the services and resources needed to produce food, such as seeds, fertilizers, and irrigation. Food security is a global issue, and it affects everyone. It is a challenge that we all need to face.</p>	<p><b>Climate change</b></p> <p>Climate change is a global issue that affects everyone. It is caused by the greenhouse effect, which is a natural process that keeps the Earth warm. However, human activities, such as burning fossil fuels, have increased the amount of greenhouse gases in the atmosphere, which is making the Earth warmer. This is causing a range of problems, including rising sea levels, more extreme weather, and changes in the amount of rainfall. Climate change is a serious threat to our planet, and we need to take action to stop it.</p>	<p><b>Food security</b></p> <p>Food security is a global issue that affects everyone.
