chemistry is the study of chemical processes and interactions of all biological and non biological components of foods The
biological substances include such items as meat poultry lettuce beer and milk as examples It is similar to biochemistry in its
main components such as carbohydrates lipids and protein but it also includes areas such as water vitamins minerals
enzymes food additives flavours and colours This discipline also encompasses how products change under certain food
processing techniques and ways either to enhance or to prevent them from happening An example of enhancing a process
would be to encourage fermentation of dairy products with lactic acid an example of a preventing process would be stopping
the Maillard reaction on the surface of freshly cut Red Delicious apples whether by hand or mechanical methods This book
presents the recent research from around the world in this field **Measurement of Antioxidant Activity and Capacity**

offers a much needed resource for assessing the antioxidant potential of food and includes proven approaches for creating
healthy food products With contributions from world class experts in the field the text presents the general mechanisms
underlying the various assessments the types of molecules detected and the key advantages and disadvantages of each
method Both thermodynamic i e efficiency of scavenging reactive species and kinetic i e rates of hydrogen atom or electron
transfer reactions aspects of available methods are discussed in detail A thorough description of all available methods
provides a basis and rationale for developing standardized antioxidant capacity activity methods for food and nutraceutical
sciences and industries This text also contains data on new antioxidant measurement techniques including nanotechnological
methods in spectroscopy and electrochemistry as well as on innovative assays combining several principles Therefore the
comparison of conventional methods versus novel approaches is made possible This important resource Offers suggestions
