Foodservice Procurement Purchasing For Profit:

Foodservice Procurement Marian C. Spears, 1999 The approach of this user friendly text is to provide undergraduate students in a commercial or noncommercial foodservice curriculum with the understanding that procurement which includes purchasing receiving storage and inventory control is the first step in preparing menu items that satisfy customers With an emphasis placed on being updated and informed about products students will learn how to make decisions about which products meet the quality standards required by the customer and at the same time find the lowest price for a product Unlike any other text on the market this book advocates that purchasing is not a cost center in the operation as it was for many years but that it contributes to the profit and every dollar saved is a dollar profit
